Islam and the Liberal State Stephen H. Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political

and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arman Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia Johnson PART B Regulations Suspension of Human Rights CHAPTER 4 Borders Exception and Sovereignty Australia's Migration Policies as Instruments of Suspension of Human Rights and International Obligations by Ana Carolina Macedo Abreu CHAPTER 5 Power and Sandwiched Sovereignty Nepali Migrant Workers in the Gulf Countries by Hari KC CHAPTER 6 The Body and Embodied Experiences in the British Asylum System Developing a Conceptual Perspective by Rebecca Mavin CHAPTER 7 Eritrean Unaccompanied Refugee Minors in The Netherlands Wellbeing and Health by Anna de Haan Yodit Jacob Trudy Mooren and Winta Ghebreab PART C Migrants Strategies and Identities CHAPTER 8 Social Inclusion Processes for unaccompanied minors in the city of Palermo Fostering Autonomy through a New Social Inclusion Model by Roberta Lo Bianco and Georgia Chondrou CHAPTER 9 Urban Resistances and Migrant Activism Challenging the Border Regime in Madrid City by Ana Santamarina and Almudena Cabezas CHAPTER 10 RefConnect A Mobile Social Network for Refugees by Evdokia Kogia Styliani Liberopoulou Nikolaos Alamanos Vasilis Pierros and Christos Michalakelis CHAPTER 11 Halo Halo Nostalgia and Navigating Life for Overseas Filipino Workers OFW's in the Kingdom of Saudi Arabia by Simeon S Magliveras

Dictators Without Borders Alexander A. Cooley, John Heathershaw, 2017-02-07 A penetrating look into the unrecognized and unregulated links between autocratic regimes in Central Asia and centers of power and wealth throughout the West Weak corrupt and politically unstable the former Soviet republics of Kazakhstan Kyrgyzstan Tajikistan and Uzbekistan are dismissed as isolated and irrelevant to the outside world But are they This hard hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics politics and security dynamics beyond its borders Yet

Central Asia's international activities are mostly hidden from view with disturbing implications for world security. Based on years of research and involvement in the region, Alexander Cooley and John Heathershaw reveal how business networks, elite bank accounts, overseas courts, third party brokers, and Western lawyers connect Central Asia's supposedly isolated leaders with global power centers. The authors also uncover widespread Western participation in money laundering, bribery, foreign lobbying by autocratic governments, and the exploiting of legal loopholes within Central Asia. Riveting and important, this book exposes the global connections of a troubled region that must no longer be ignored.

Nature's Crossroads George Vrtis, Christopher W. Wells, 2023-01-10 Minnesota's Twin Cities have long been powerful engines of change. From their origins in the early nineteenth century, the Twin Cities helped drive the dispossession of the region's Native American peoples, turned their riverfronts into bustling industrial and commercial centers, spread streets and homes outward to the horizon, and reached well beyond their urban confines, setting in motion the environmental transformation of distant hinterlands. As these processes unfolded, residents inscribed their culture into the landscape, complete with all its tensions, disagreements, contradictions, prejudices, and social inequalities. These stories lie at the heart of *Nature's Crossroads*. The book features an interdisciplinary team of distinguished scholars who aim to open new conversations about the environmental history of the Twin Cities and Greater Minnesota.

Sovereignty through Practice Elia Bescotti, Jon-Wyatt Matlack, 2024-11-15 This book explores how actors practise sovereignty as a force in a multiscale context. Among the various power structures that perform sovereignty, such as the head of state, a legislative body, or the military, one aspect is clear: the practice of sovereignty relies upon people at multiple levels, better portrayed as scales of authority. This book focuses on actors, the people who bring sovereignty to life, who imbue it with meaning, and who are ultimately responsible for its practice. With that perspective, the volume interprets various case studies, such as Russian approaches to sovereignty in its leadership and Central Bank, Scottish parties, discourses, and NATO command structures. Beyond those contexts, the work also examines Chinese digital platforms, criminal gangs in Latin America, Polish and Czech nationalist movements, and states in Kurdistan, Iraq, and Abkhazia. And Polish video games, together, these examples demonstrate how actors practise sovereignty in unity with, but also in place of, the state. As proof of concept, the authors further examine how they, as researchers, also qualify as practitioners of sovereignty. In a concluding three-chapter section, they reflexively explore how research methods and disciplines of study actively shape sovereignty and how the latter defines the outer limits of scholarly research. This book will be of interest to students of statehood, sovereignty, discourse, analysis, history, political science, sociology, and international relations.

Globalization and Urbanization James H. Spencer, 2014-06-26 During the past decade, the world reached the point of becoming more urban than not, as the majority of people on the planet now live not in small towns or villages but in provincial, national, and global cities. Scholars have long been fascinated by so-called global cities, world cities, and the urban engines of the global economy. James H. Spencer argues, however, that such an emphasis misses the central fact that

urbanization goes well beyond the usual suspects of New York Tokyo London and Shanghai The author charts urbanization across the Global South and North resulting in what he describes as a planetary global urban ecosystem This concept that challenges us to realize that in daily life their similar physical and social ecosystems that make cities more understandable to each other than to their own rural hinterlands Spencer s vivid case studies of Addis Ababa Ho Chi Minh City Honolulu and New York draw out the commonalities of our intertwined built and social environments and how they express a shared humanity across continents and cultures

Land Grabbing in Africa Fasil Demissie, 2017-10-02 The sign that Africa is on Sale has been appearing with regular frequency in major newspaper accounts across the world indicating that large amounts expanses of Africa s rich farmlands are being sold to transnational investors usually on long term leases at a rate not seen in decades indeed not since the colonial period Transnational and national economic actors from various business sectors oil and auto mining and forestry food and chemical bioenergy etc are eagerly acquiring or declaring their intention to acquire large areas of land on which to build maintain or extend large scale extractive and agro industrial enterprises to help secure their own food and energy needs into the future This book provides a critical appraisal of the growing phenomenon of land grabbing in Africa Far from being a technical issue associated good governance the problem of land grabbing by transnational corporation and states is a serious threat for the food security of millions of Africans and is undoubtedly one of the great challenges of our time for development on the continent The case studies illustrate that African states are also complicit in the massive land grabbing by actively participating in isolated development while excluding the local communities The case studies reveal key features that characterize how the global land grab plays out in specific localities in Africa This book was published as a special issue of African Identities
