Living with Floods in a Mobile Southeast Asia Carl Middleton, Rebecca Elmhirst, Supang Chantavanich, 2017-11-02 This book contributes to a better understanding of the relationship between migration vulnerability resilience and social justice associated with flooding across diverse environmental social and policy contexts in Southeast Asia It challenges simple analyses of flooding as a singular driver of migration and instead considers the ways in which floods figure in migration based livelihoods and amongst already mobile populations The book develops a conceptual framework based on a mobile political ecology in which particular attention is paid to the multidimensionality temporalities and geographies of vulnerability Rather than simply emphasising the capacities or lack thereof of individuals and households the focus is on identifying factors that instigate manage and perpetuate vulnerable populations and places these include the sociopolitical dynamics of floods flood hazards and risky environments migration and migrant based livelihoods and the policy environments through which all of these take shape The book is organised around a series of eight empirical urban and rural case studies from countries in Southeast Asia where lives are marked by mobility and by floods associated with the region's monsoonal climate The concluding chapter synthesises the insights of the case studies and suggests future policy directions Together the chapters highlight critical policy questions around the governance of migration institutionalised disaster response strategies and broader development agendas

Black Gold and Blackmail Rosemary A. Kelanic, 2020-05-15 Black Gold and Blackmail seeks to explain why great powers adopt such different strategies to protect their oil access from politically motivated disruptions In extreme cases such as Imperial Japan in 1941 great powers fought wars to grab oil territory in anticipation of a potential embargo by the Allies in other instances such as Germany in the early Nazi period states chose relatively subdued measures like oil alliances or domestic policies to conserve oil What accounts for

this variation Fundamentally it is puzzling that great powers fear oil coercion at all because the global market makes oil sanctions very difficult to enforce Rosemary A Kelanic argues that two variables determine what strategy a great power will adopt the petroleum deficit which measures how much oil the state produces domestically compared to what it needs for its strategic objectives and disruptibility which estimates the susceptibility of a state s oil imports to military interdiction that is blockade Because global markets undercut the effectiveness of oil sanctions blockade is in practice the only true threat to great power oil access That combined with the devastating consequences of oil deprivation to a state s military power explains why states fear oil coercion deeply despite the adaptive functions of the market Together these two variables predict a state s coercive vulnerability which determines how willing the state will be to accept the costs and risks attendant on various potential strategies Only those great powers with large deficits and highly disruptible imports will adopt the most extreme strategy direct control of oil through territorial conquest Disasters Without Borders John Hannigan,2013-04-17

Dramatic scenes of devastation and suffering caused by disasters such as the 2011 Japanese earthquake and tsunami are viewed with shock and horror by millions of us across the world What we rarely see however are the international politics of disaster aid mitigation and prevention that condition the collective response to natural catastrophes around the world In this book respected Canadian environmental sociologist John Hannigan argues that the global community of nations has failed time and again in establishing an effective and binding multilateral mechanism for coping with disasters especially in the more vulnerable countries of the South Written in an accessible and even handed manner Disasters without Borders it is the first comprehensive account of the key milestones debates controversies and research relating to the international politics of natural disasters Tracing the historical evolution of this policy field from its humanitarian origins in WWI right up to current efforts to cast climate change as the prime global driver of disaster risk it highlights the ongoing mismatch between the way disaster has been conceptualised and the institutional architecture in place to manage it The book s bold conclusion predicts the confluence of four emerging trends politicisation militarisation catastrophic scenario building privatisation of risk and quantification which could create a new system of disaster management wherein insurance logic will replace humanitarian concern as the guiding principle Disasters Without Borders is an ideal introductory text for students lecturers and practitioners in the fields of international development studies disaster management politics and international affairs and environmental geography sociology **NewsNet** American Association for the Advancement of Slavic Studies,1999
