Handbook of Literacy and Technology David Reinking, Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, 1998-04-01 The major shift going on today in the technologies of reading and writing raises important questions about conventional conceptions of literacy and its role in education society and culture What are the important characteristics of electronic forms of reading and writing distinguishing them from printed forms To what extent and in what ways is literacy being transformed by new technologies This central question is addressed in this volume from diverse multidisciplinary perspectives The contributing authors focus on a guiding question in one of the following areas which correspond to the major sections of the book Transforming Texts What are the new differences between printed and electronic texts and what are the implications of new textual forms for defining literacy especially in regard to teaching and

learning in schools Transforming Readers and Writers How do electronic reading and writing change conceptualizations of literacy development from childhood through adulthood Transforming Classrooms and Schools What are the effects of introducing new reading and writing technologies into schools and classrooms Transforming Instruction How can instruction be adapted in response to the changing literacy landscape and how can teachers and students exploit forms of reading and writing to enhance teaching and learning Transforming Society What are the broad societal implications of the increasing prevalence of electronic forms of reading and writing Transforming Literacy Research What are the questions that must be addressed as digital reading and writing become more common and what approaches to research will be most useful in addressing those questions This volume is the result of an interactive process The contributors met as a group to discuss drafts of their chapters at a one day meeting convened and sponsored by the National Reading Research Center and had read each others chapters prior to this gathering That meeting was followed by a two day conference attended by approximately 180 researchers educators and policymakers who responded to an open invitation to present papers and to attend sessions focusing on the six major themes of the book Contributors then revised their chapters based on interactions with fellow contributors conference participants and volume editors Thus this work is more than just a compilation of the individual authors views Rather it represents a synthesis of a broad range of current thinking about how literacy is being and may be transformed by technology

Portfolio Portraits Donald H. Graves,Bonnie S. Sunstein,1992 *Portfolio Portraits* offers unique portraits of portfolio keepers from first graders to university sophomores and graduate students from teachers in graduate classes to administrators in public schools *Resources in Education* ,2000 Young Children and Families in the Information Age Kelly L. Heider,Mary Renck Jalongo,2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for

educators to prepare students for the future without teaching them how to be effective information managers and technology users. Although much has been written about information literacy and technology literacy in secondary education, there is very little published research about these literacies in early childhood education. Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs. This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects. Many assume that today's young children are digital natives with a great understanding of technology. However, children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities. This book argues that information and technology literacy include more than just familiarity with the digital environment. They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions. *The Portfolio Connection* Susan Belgrad, Kay Burke, Robin J. Fogarty, 2008-04-04

This third edition covers implementing portfolios that incorporate standards. Includes examples for students with special needs plus expanded information on e-portfolios and NCLB's impact on assessment. **Student-Led Conferencing Using Showcase Portfolios** Barbara P. Benson, Susan P. Barnett, 2005-02-15 Help your students demonstrate what they know and why they have learned it. The increasing focus on standards and accountability has brought a new breed of challenges educators today must not only engage students but also their parents; they must not only provide authentic assessments but also communicate them in meaningful ways. With the help of this updated edition of a bestseller, educators can achieve this and more as they turn student work into insightful showcase portfolios and transform the oft-dreaded parent conferences into powerful learning and assessment opportunities. The user-friendly and time-tested strategies outlined in the manual have been successfully implemented in classrooms throughout North America and real-life examples are provided to illustrate how the approach can be applied at any grade level and for any subject matter. Newly added features to this comprehensive text include: Strategies for beginning the portfolio process with students; Current research findings that support student-led conferencing; Easy-to-use timelines and sample schedules; Blackline masters that cut down on teacher prep time; The latest information on electronic portfolios. In today's standards-based and accountability-driven classroom, teachers are increasingly seeking ways to demonstrate that their students know what they are learning and are aware of why they are learning it. This groundbreaking guide shows how the combination of portfolios and student-led conferences can increase student understanding. Using this technique, students will be able to take charge of their learning and are able to clearly communicate the goals of their education with fellow students, administrators, and parents.
