Bill Israelson, 2014-09-22 Creating an idealized image of a subject is a portrait photographer's job. However, the approach is not quite formulaic. From one subject to the next and one day to the next, there are different goals and scenarios. On Monday, you may be tasked with photographing your subjects under cloudy skies on a beach. On Tuesday, you may need to downplay your client's wide hips in the studio. On Wednesday, you may want to create dramatic lighting for an actor's portfolio on stage. Every day, there is a unique challenge to meet, often under varying conditions. So how do you make a magically good portrait during every shoot? In this book, Bill Israelson shows you how to tackle the problem of creating a great portrait of your every client. Beginning with a discussion on equipment essentials, breaking the discussion into two topics: gear for studio work and portable equipment for location work. Next, you'll learn simple posing strategies for making women, men, kids, and groups look their best in any presentation. You'll learn how to position the body from head to toe to maximize assets and downplay common problem areas. Lighting is the backbone of every image. In the studio, you have complete control over every facet of the lighting, from its hardness or softness to its color temperature and direction. On location, the basic principles of good lighting still apply, but the quality and quantity of light is subject to change. Israelson shows you how to harness the available light and supplement it when needed to create saleable images every time. With straightforward, jargon-free text and a wide range of image examples, this book will help you quickly learn how to improve your portrait results to create client-pleasing portraits every time.

Selected Readings on the Human Side of Information Technology Szewczak, Edward J., 2008-08-31 This book presents quality articles focused on key issues concerning the behavioral and social aspects of information technology. Smith, 2014-04-15 There are many aspects to professional photography: composition, camera angles, exposure, color balance, posing, and lighting, just to name a few. However, while each of these aspects of photography is important in the creation of a professional portrait, lighting presents a special challenge that is part art and part science. When the two come together effectively, the results are stunning; when any one aspect of the recipe falls short, the result is a poor exposure or a downright unflattering look. On the artistic side of the scale, lighting is one of the primary tools for setting the mood of the portrait. It can communicate a sense of bright, airy ease or sharp dramatic tension or anything in between. Determining what look is right for the client and for their intended use of the resulting portraits is a key decision. From there, the photographer can begin to use light to sculpt the subject's features, minimizing problem areas or accentuating the subject's best features through the selection of light modifiers and the positioning of the lights themselves. Moving to the technical side, outdoor lighting presents particular challenges but also some significant advantages. Outdoors, photographers shoot at least partially with natural light. While this is most of the day, an abundant light source, it is largely out of the control of the photographer. The light can change from moment to moment as clouds pass between the earth and sun. It also changes continually throughout the day as the sun

moves across the sky Since he can't completely control the light the photographer must be prepared to adapt his subject's pose and position to create flattering results with the light as is Alternately the photographer can tweak the lighting by augmenting the sunlight with flash or reflectors or even softening it using scrim or other diffusers Of course this leaves another major concern the background Even if the light on the subject can be perfected rarely can the photographer also control the light on an area as large as the background making it a major concern in the process of posing and lighting So given all this why would any photographer choose to make portraits outside One advantage is that the lighting and scenes are free making outdoor photography a great starting point for those entering the field Even established studios however have found that clients simply like the natural timeless look of outdoor portraits This makes them strong sellers Additionally most portrait subjects are more at ease in natural light than when seated in front of bright noisy studio flash units and relaxed subjects translate into better expressions and better overall portraits In this book Smith takes you through the process of lighting outdoor portraits from start to finish covering both the artistic and technical aspects of achieving success Short one or two page lessons are amply illustrated to guide the reader through each phase In many cases before and after images or image sequences showing variations and alternative approaches are presented to facilitate learning Readers are encouraged to have this book with them during practice sessions and work on replicating or refining the provided examples creating a self study course in the art of lighting for outdoor portrait photography

Social Identities Between the Sacred and the Secular Abby Day, Giselle Vincett, Christopher R. Cotter, 2016-04-01 Focusing on the important relationship between the sacred and the secular this book demonstrates that it is not paradoxical to think in terms of both secular and sacred or neither in different times and places International experts from a range of disciplinary perspectives draw on local national and international contexts to

provide a fresh analytical approach to understanding these two contested poles Exploring such phenomena at an individual institutional or theoretical level each chapter contributes to the central message of the book that the in between is real embodied and experienced every day and informs and is informed by intersecting social identities Social Identities between the Sacred and the Secular provides an essential resource for continued research into these concepts challenging us to re think where the boundaries of sacred and secular lie and what may lie between Mind over Memes Diana
