

2024 ECONOMICS 12 MACROECONOMICS ESSAYS (P1)

A. CIRCULAR FLOW

1. Discuss in detail the markets within the FOUR-SECTOR model. (20 marks)

INTRODUCTION

- ✓ **Market** is the mechanism that brings buyers and sellers together to exchange goods and services. ✓✓
- ✓ Markets coordinate economic activities and determine prices of goods and services. ✓✓

BODY

PRODUCT AND FACTOR MARKETS

Product market/Goods/Output markets ✓

- Product market is where goods and services are exchanged for money. ✓✓
- E.g. Shoprite retailer. ✓
- These are markets for consumer goods and services. ✓✓
- **In economics a distinction is made between goods and services:**
- Goods are defined as any tangible items such as clothing, food cars that satisfy human wants or need. ✓✓
- Capital and consumer goods are traded in these markets. ✓✓
- Capital goods market are trading buildings and machinery. ✓✓
- Consumer goods markets are trading durable consumer goods, semi-durable goods and non-durable goods. ✓✓
- Services are defined as non-tangible actions e.g. wholesalers and retailer, transport and financial markets. ✓✓

Factor market/Resource/Input markets ✓

- Factor market is where factors of production are traded. ✓✓ e.g. labour is hired and capital is borrowed. ✓✓
- Households sell factors of production in this market. ✓✓
- These services earn wages for labour, interest for capital, rent for natural resources and profits for entrepreneurship. ✓✓
- Labour can be bought and sold in this market. ✓✓
- Factor market includes labour, property and financial markets. ✓✓
 - ✓ Product markets and factor markets are related in the sense that the demand for factor services is a derived demand. ✓✓

Possible Essays For Final Exam Economics Grade11:

Essays on the Determinants of Student Choices and Educational Outcomes Justin A. Wong, 2011 This dissertation is composed of three essays Essay 1 Does School Start Too Early For Student Learning considers the connection between school start time and student performance Biological evidence indicates that adolescents internal clocks are designed to make them fall asleep and wake up at later times than adults This science has prompted widespread debate about delaying school start times in the U S a country which has some of the earliest start times worldwide The debate suffers however from a glaring absence of evidence the small number of prior studies has been too low powered statistically to test whether later start times improve achievement I fill the gap by studying achievement across a large nationally representative set of high schools that have varying start times I identify the positive effect of later clock start times as well as the independent effect of greater daylight at school start time My primary empirical method is cross sectional regression with rich controls for potentially confounding variables The findings are confirmed by regression discontinuity analysis focused on schools close to time zone boundaries I quantify the net gain in welfare from having an additional hour of sunlight before school starts by comparing the substantial lifetime earnings benefits for students against the likely the societal costs Essay 2 Student Success and Teaching Assistant Effectiveness In Large Classes considers the impact teaching assistants TAs have on student performance In universities TAs play a crucial role by providing small group instruction in lecture courses with large enrollment The multiplicity of TAs creates both positive opportunities and negative incentives On the one hand some TAs may excel at tasks such as helping struggling students at which other TAs fail If so all students may be able to learn better if they can match themselves to the TA that best suits their needs On the other hand the multiplicity of TAs means that students in the same class often receive instruction that varies in quality even though they are ultimately graded on the same standard In this paper we use data from a large lecture course in which students are conditionally randomly assigned to TAs In addition to administrative data on scores and grades we use survey data which we generated on students initial preparation their study habits and their interactions with TAs We identify the existence of variation among TAs in teaching effectiveness We also identify how TAs vary in their effectiveness with certain subpopulations of students the least and best prepared students with different backgrounds and so on Using our parameter estimates we simulate student achievement under scenarios such as random assignment to TAs elimination retraining of the least effective TAs and matching of TAs to students based on initial information to show the potential gains in student welfare from more efficient matching Essay 3 A Study of Student Majors A Historical Perspective considers whether differing financial returns across degrees are a significant factor in a student s choice of a major During the late 1990s the U S experienced a technology boom that significantly increased the initial salary offers to engineering students and computer science students in particular These dramatic increases in returns provide an excellent opportunity to examine not only how students respond to salary levels but also to salary trends The

existing literature has focused on the extent to which differing financial returns can affect a student's choice of undergraduate major. This paper extends the analysis to test if trends in salary levels also affect the share of students selecting into various majors using a comprehensive dataset of all post secondary institutions. I find that students select into majors that offer higher salaries and have greater wage growth. Using a flexible empirical model that allows students to respond to both changes in salary levels and growth, I find that the results hold across majors and within engineering disciplines. These results help to explain why, for instance, the percentage of students choosing to major in computer science grew more rapidly than could be explained by salary level alone. **Labor Economics Course Materials**, 1981

Economics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-06-30 Organizations, governments, and corporations are all concerned with distributing their goods and services to those who need them most, consequently benefiting in the process. Only by carefully considering the interrelated nature of social systems can organizations achieve the success they strive for. Economics Concepts, Methodologies, Tools, and Applications explores the interactions between market agents and their impact on global prosperity. Incorporating both theoretical background and advanced concepts in the discipline, this multi-volume reference is intended for policymakers, economists, business leaders, governmental and non-governmental organizations, and students of economic theory. **The Journal of Economic Education**, 1978 Resources in Education, 1997-10 **Ebony**, 2001-09 EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American focused magazine. **Icons and Institutions** Oscar L.
