

# Chapter 3

## Reasons for public sector failure

### Introduction

- Public sector failure occurs when the economy and the country's resources are managed in such a way that the welfare of the people is not improved and the delivery of services is ineffective and inefficient.

### Management Failure

- Government departments are poorly managed due to bureaucracy, lack of leadership, training and experience.
- These departments are not expected to maximise profits. They receive budget allocations based on estimated costs and needs.
- Factors can result in budget allocations not being spent-resources are wasted.
- This is linked to efficiency as a problem of public sector provisioning.

### Agency (accountability)

- Successful public production relies on long-term accountability.
- Accountability is the duty of an individual or organisation to explain their decisions and actions and accept responsibility for their behaviour.
- Lack of accountability leads to inefficiency, corruption and poor service delivery.

### Lack of motivation

- Workers rarely receive incentives for successful service delivery.
- There is little stipulation for service quality and quantity, no measurement of effectiveness or productivity and few rewards or penalties.
- The provider only monitors inputs and compliance with processes and procedures.
- This links to typical problems experienced through public sector provisioning of efficiency and assessing needs.

### Behaviour of politicians

- Those who aim to be re-elected and who pursue vote-maximising strategies to secure or retain their political offices.
- Such politicians have a short-term horizon which is limited to the date of the next election.
- This means that they promote policies and spend money on projects as long as they can get votes in return.
- This may be linked to accountability and efficiency as problems of public provisioning.

### Bureaucracy

- When rules and procedures are inflexible and complex, we are dealing with problems of bureaucracy.
- As a result, policies take too long to be implemented or are not implemented successfully.
- Those who try to maximise their income, status, power or prestige (bureaucrats) are empathic and insensitive to the needs of the public.

**Generation Jobless?** P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set **Inequality in America** Stephen M. Caliendo, 2018-05-15 Why does inequality have such a hold on American society and public policy And what can we as citizens do about it Inequality in America takes an in depth look at race class and gender based inequality across a wide range of issues from housing and education to crime employment and health Caliendo explores how individual attitudes can affect public opinion and lawmakers policy solutions He also illustrates how these policies result in systemic barriers to advancement that often then contribute to individual perceptions This cycle of disadvantage and advantage can be difficult though not impossible to break Representing and What Can I Do feature boxes throughout the book highlight key public figures who have worked to combat inequality and encourage students to take action to do the same The second edition has been thoroughly revised to include the most current data and to cover recent issues and events like the 2016 elections and the Black Lives Matter movement It now also includes a brand new chapter on crime and criminal justice and an expanded discussion of immigration Concise and accessible Inequality in America paves the way for students to think critically about the attitudes behaviors and structures of inequality *Let's Be Reasonable* Jonathan Marks, 2023-01-31 A conservative college professor s compelling defense of liberal education Not so long ago conservative intellectuals such as William F Buckley Jr believed universities were worth fighting for Today conservatives seem more inclined to burn them down In Let s Be Reasonable conservative political theorist and professor Jonathan Marks finds in liberal education an antidote to this despair arguing that the true purpose of college is to encourage people to be reasonable and revealing why the health of our democracy is at stake Drawing on the ideas of John Locke and other thinkers Marks presents the case for why now more than ever conservatives must not give up on higher education He recognizes that professors and administrators frequently adopt the language and priorities of the left but he explains why conservative nightmare visions of liberal persecution and indoctrination bear little resemblance to what actually goes on in college classrooms Marks examines why advocates for liberal education struggle to offer a coherent defense of themselves against their conservative critics and demonstrates why such a defense must rest on the cultivation of reason and of pride in being reasonable More than just a campus battlefield guide Let s Be Reasonable recovers what is truly liberal about liberal education the ability to reason for oneself and with others and shows why the liberally educated person considers reason to be more than just a tool for scoring political points *Critical Thinking Skills* Stella Cottrell, 2023-03-23 The ability to demonstrate critical thinking is essential for students who seek to achieve good grades at university but it typically creates a lot of confusion and anxiety Critical Thinking Skills provides an easy to follow step by step guide to developing analytical

reasoning skills and applying them to tasks such as reading note making and writing A complex subject is broken down into easy to understand blocks with clear explanations good examples and plenty of activities to develop understanding at each stage Students can use this book to Critically assess other people s arguments Recognise flawed reasoning Evaluate the material used to support arguments Apply critical thinking when reading writing and making notes Write excellent essays and reports The 4th edition features a new section on argument mapping techniques which help readers to visualize the structures of an argument It also contains new and updated examples that link to current affairs showing the importance of critical thinking as a lifelong skill Written by internationally renowned author Stella Cottrell this is an essential resource for students looking to refine their thinking reading and writing skills

**Born to Choose** John H Falk,2017-09-05 Born to Choose is John H Falk s compelling account of why and how we make the endless set of choices we do every second of every day of our lives Synthesizing research from across the biological and social sciences Falk argues that human choice making is an evolutionarily ancient and complex process He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well being This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall

Mitchell Reyes, 2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines *Arguing with Numbers* shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical

and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnestock Andrew C Jones Joseph Little and Edward Schiappa
