French Muslims Sharif Gemie,2010-08-01 This book provides a detailed analysis of the political arguments about the place of Muslims in contemporary France and also discusses the ideas put forward by a range of Muslim thinkers France has become the setting for one of the most important conflicts in the modern world On the one hand it possesses a rigidly organized centralized state whose bureaucrats and civil servants are animated by a code of secular activism On the other hand France is also the home for Europe s largest Muslim minority variously estimated at numbering between four and six million people This means that in terms of simple numbers France can be counted as the world s fifteenth Islamic power Previous conflicts with religion have left a deep impression on French political culture from the sixteenth and seventeenth century conflicts between Catholics and Protestants played to the formation of the collaborationist Vichy government in 1940 In recent decades Muslims have been stigmatized as an irreconcilable minority unable to adapt to the secular culture of the majority of French citizens This work draws out the political implications of the current conflict It is based on events and publications produced in a single five year period beginning with the shock of the 2002 Presidential elections in which Le Pen was the second most successful candidate ranging through the legislation of March 2004 which banned the Islamic headscarf from French state schools and which sparked off a series of bad tempered exchanges between left and right wing French nationalists anti racism campaigners secularists anti clericals and a variety of Muslim authors *Contingency in a Sacred Law* Baber Johansen,2023-09-29 This book focuses on the Hanafite school of fiqh which originated in the eight century and is geographically the most widespread and numerically the most important representative of Muslim normativeness The fiqh consists of liturgical ethical and legal norms derived from the Islamic revelation The introduction outlines the main boundaries between fiqh and theology and follows the modern debate on the comparison between the fiqh and the secularized law of the modern Occident The core of the book is dedicated to the way in which the fiqh in the period between the 10th and the 12th centuries adapted to changing circumstances of urban and agricultural life chapters I and II to the way in which it marked off legal from ethical norms chapter III religious from legal status chapters IV to VI and legal propositions from religious judgment chapter VII The forms in which change of norms was made acceptable is discussed in chapter VIII The last chapter deals with an attempt of Shi i scholars in the Islamic Republic of Iran to answer new problems in old forms

Studies in the Economic History of the Middle East M. A. Cook, 2015-12-22 First Published in 2004 Did medieval Muslims have the concept of a social class If not can we usefully employ the term in analysing their society Were there such things as guilds in the medieval Middle East Would we understand the economic de'cline of Mamluk Egypt better if we used paradigms derived from the study of the economic history of England and Italy in the fourteenth and fifteenth centuries How much can the enormous fiscal archive of the Ottoman Empire tell us about population history Why was the Middle East so backward if indeed it was compared with the rest of the Afro Asian world in the nineteenth century Have Iran and Iraq better prospects for economic growth than otherwise comparable countries thanks to their oil royalties Or are these paradoxically a hindrance rather than a help The study of the economic history of the Middle East in Islamic times is notoriously underdeveloped This volume contains papers discussed at an international conference held at the School of Oriental and African Studies in 1967 together with three short critical essays which attempt to tie them together Some papers are specific contributions to research others survey wider areas The volume is not a comprehensive history or a systematic inventory but it is hoped that in addition to presenting a set of papers which are interesting in themselves it will give the reader a tolerable idea of the state of studies in the field
