fact the papers deal with conceptual and in particular philosophical problems that pop up in almost every one of the provinces of the vast territory constituted by the foundations methodology and philosophy of science A couple of border territories which are in the process of being infiltrated have been added for good measure The inclusion of papers in the philosophy of formal science and in the philosophies of physics and of biology in a volume belonging to a series devoted to the philosophy and methodology of the social and behavioral sciences should raise no eyebrows Because the sciences of man make use of logic and mathematics they are interested in questions such as whether the formal sciences have anything to do with reality rather than with our theories about reality and whether or not logic has kept up with the practice of mathematicians These two problems are tackled in Part II on the philosophy of formal science
