String Processing and Information Retrieval Alberto Apostolico, Massimo Melucci, 2004-12-07 The papers contained in this volume were presented at the 11th Conference on String Processing and Information Retrieval SPIRE held Oct 5 8 2004 at the Department of Information Engineering of the University of Padova Italy They were selected from 123 papers submitted in response to the call for papers In addition there were invited lectures by C J van Rijsbergen University of Glasgow UK and Setsuo Arikawa Kyushu University Japan In view of the large number of good quality submissions some were accepted this year also as short abstracts These also appear in the proceedings Papers solicited for SPIRE 2004 were meant to constitute original contributions to areas such as string pattern searching matching and discovery data compression text and data mining machine learning tasks methods algorithms media and evaluation in information retrieval digital libraries and applications to and interactions with domains such as genome analysis speech and natural language processing Web links and communities and multilingual data SPIRE has its origins in the South American Workshop on String Processing which was first held in 1993 Starting in 1998 the focus of the symposium was broadened to include the area of information retrieval due to the common emphasis on information processing The first 10 meetings were held in Belo Horizonte Brazil 1993 Valparaiso Chile 1995 Recife Brazil 1996 Valparaiso Chile 1997 Santa Cruz Bolivia 1998 Cancun Mexico 1999 A Coruna Spain 2000 Laguna San Rafael Chile 2001 Lisbon Portugal 2002 and Manaus Brazil 2003

Cybersecurity Teaching in Higher Education Leslie F. Sikos, Paul Haskell-Dowland, 2023-05-15 This book collects state of the art curriculum development considerations training methods techniques and best practices as well as cybersecurity lab requirements and aspects to take into account when setting up new labs all based on hands on

experience in teaching cybersecurity in higher education In parallel with the increasing number and impact of cyberattacks there is a growing demand for cybersecurity courses in higher education More and more educational institutions offer cybersecurity courses which come with unique and constantly evolving challenges not known in other disciplines For example step by step guides may not work for some of the students if the configuration of a computing environment is not identical or similar enough to the one the workshop material is based on which can be a huge problem for blended and online delivery modes Using nested virtualization in a cloud infrastructure might not be authentic for all kinds of exercises because some of its characteristics can be vastly different from an enterprise network environment that would be the most important to demonstrate to students The availability of cybersecurity datasets for training and educational purposes can be limited and the publicly available datasets might not suit a large share of training materials because they are often excessively documented but not only by authoritative websites which render these inappropriate for assignments and can be misleading for online students following training workshops and looking for online resources about datasets such as the Boss of the SOC BOTS datasets The constant changes of Kali Linux make it necessary to regularly update training materials because commands might not run the same way they did a couple of months ago The many challenges of cybersecurity education are further complicated by the continuous evolution of networking and cloud computing hardware and software which shapes student expectations what is acceptable and respected today might be obsolete or even laughable tomorrow

Analysis of Structures Through Unified Formulation deals with the FEM used for the analysis of the mechanics of structures in the case of linear elasticity. The novelty of this book is that the finite elements FEs are formulated on the basis of a class of theories of structures known as the Carrera Unified Formulation CUF. It formulates 1D, 2D and 3D FEs on the basis of the same fundamental nucleus that comes from geometrical relations and Hooke's law and presents both 1D and 2D refined FEs that only have displacement variables as in 3D elements. It also covers 1D and 2D FEs that make use of real physical surfaces rather than artificial mathematical surfaces which are difficult to interface in CAD/CAE software. Key features: Covers how the refined formulation can be easily and conveniently used to analyse laminated structures such as sandwich and composite structures and to deal with multifield problems. Shows the performance of different FE models through the best theory diagram which allows different models to be compared in terms of accuracy and computational cost. Introduces an axiomatic asymptotic approach that reduces the computational cost of the structural analysis without affecting the accuracy. Introduces an innovative component wise approach to deal with complex structures. Accompanied by a website hosting the dedicated software package MUL2 www.mul2.com. Finite Element Analysis of Structures Through Unified Formulation is a valuable reference for researchers and practitioners and is also a useful source of information for graduate students in civil mechanical and aerospace engineering.

Electronic Government Roland Traunmüller, 2004-11-05. This book constitutes the refereed proceedings of the Third International Conference on Electronic Government EGOV 2004 held in Zaragoza, Spain in August-September 2004. The 92 revised papers presented together with an introduction and abstracts of 16 workshop papers were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on: e-democracy, interoperability, process management, technical issues, e-voting, services, processes and general assistance, empowering regions, methods and tools, g2g collaboration, change and risk management, e-governance, ID management and security, policies and strategies, geographical information systems, legal aspects, teaching and empowering, designing, Web services, public information and regional developments in global context.

World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada David A. Jaffray, 2015-07-13. This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics, a tri-annual high level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine. The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare. It provides a unique and important forum to secure a coordinated multileveled global response to the need, demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health.

Teaching Landscape Karsten Jørgensen, Nilgöl Karadeniz, Elke Mertens, Richard Stiles, 2019-08-30. Teaching Landscape: The Studio Experience gathers a range of expert contributions from across the world to collect best practice examples of teaching landscape architecture studios. This is the companion volume to

The Routledge Handbook of Teaching Landscape in the two part set initiated by the European Council of Landscape Architecture Schools ECLAS Design and planning studio as a form of teaching lies at the core of landscape architecture education They can simulate a professional situation and promote the development of creative solutions based on gaining an understanding of a specific project site or planning area address existing challenges in urban and rural landscapes and often involve interaction with real stakeholders such as municipality representatives residents or activist groups In this way studio based planning and design teaching brings students closer to everyday practice helping to prepare them to create real world problem solving designs This book provides fully illustrated examples of studios from over twenty different schools of landscape architecture worldwide With over 250 full colour images it is an essential resource for instructors and academics across the landscape discipline for the continuously evolving process of discussing and generating improved teaching modes in landscape architecture
