

• Preventive RA

The display below shows a preventive RA display. Your aircraft is descending at 1700 fpm, well outside the restricted vertical speed indicated by the red arc. The red arc advises that you should not climb at any vertical speed to avoid the threat aircraft at 12 o'clock and 600 feet above you. Simultaneous with the time this traffic was upgraded from a TA to an RA display, an aural alert message would have annunciated, "Monitor vertical speed." ("Monitor vertical speed. Monitor vertical speed." for version 6.04A).

Proximate traffic is also shown in this display. The solid diamond at 11:00 o'clock and 3.5 miles is 700 feet above your own altitude and descending. The other proximate traffic is at 2:00 o'clock and 4 miles, 100 feet below your altitude and climbing. Neither of these intruders poses a present threat.

If the threat aircraft maneuvers to cause a new conflict before the RA clears, a corrective RA may be issued, overriding the preventive RA.

• No-Bearing Messages

When an intruder is detected but no bearing can be determined for the aircraft, a no-bearing message is displayed in slot 6 (and slot 7 if two, or more, aircraft produce this situation; highest priority will be displayed first). The message provides range, altitude, and trend in vertical speed of the RA or TA intruder(s). If altitude of the no-bearing target cannot be determined, no message is issued for that target. Message color is red if the intruder is causing an RA, or yellow if causing a TA.

In the message shown in the photo above, the yellow "TA" indicates that the intruder is causing a traffic alert. The "1.2" indicates a distance to the intruder of 1.2 miles. The "00" indicates that the intruder is level at your own altitude. An RA no-bearing message, displayed in red, would be interpreted similarly.

applications in the areas of positioning and navigation surveying geodesy and geodynamics and remote sensing and timing Each chapter is written by international experts and amply illustrated with figures and photographs making the book an invaluable resource for scientists engineers students and institutions alike

The Mechatronics Handbook - 2 Volume Set Robert H. Bishop, 2018-10-08 The first comprehensive reference on mechatronics The Mechatronics Handbook was quickly embraced as the gold standard in the field From washing machines to coffeemakers to cell phones to the ubiquitous PC in almost every household what these days doesn't take advantage of mechatronics in its design and function In the scant five years since the initial publication of the handbook the latest generation of smart products has made this even more obvious Too much material to cover in a single volume Originally a single volume reference the handbook has grown along with the field The need for easy access to new material on rapid changes in technology especially in computers and software has made the single volume format unwieldy The second edition is offered as two easily digestible books making the material not only more accessible but also more focused Completely revised and updated Robert Bishop's seminal work is still the most exhaustive state of the art treatment of the field available
