North West University Application Form 2015:

A Scholarship of Doctoral Education Petro du Preez, Shan Simmonds, 2018-11-21 This edited collection is cohesive by a focus on becoming becoming a doctoral student becoming a researcher becoming an academic and becoming a supervisor This journey of becoming takes us from pre enrolment in a doctoral programme through the many phases of candidature and into the post doctoral environment Both advancing theory and providing very practical examples this book is of immense value to doctoral students and academics not only in South Africa for whom it should be a mandatory read but also for doctoral education researchers doctoral students and supervisors worldwide as the themes covered extend well beyond the borders of South Africa Leadership Approaches to Negotiate Challenges in a Changing Education Landscape Leentjie van Jaarsveld, Kobus Mentz, Charl C. Wolhuter, 2020-12-31 The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse Such allegations are made and frequently stronger adjectives than non satisfactory are used Results of international test series in which South Africa has participated such as the 2015 TIMSS tests confirm the negative verdicts found in the public and scholarly discourse This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors one factor that can make a difference in the achievement levels obtained by learners in schools is leadership The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation blaming all ills in the education system and educational institutions on historical legacies and or contextual factors such as socio economic deprivation in the catchment areas of schools or poor resources and infrastructure This collected work was inspired by a recently published spate of articles on top performing schools including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges The book unpacks the issue of leadership in South African schools from a variety of perspectives thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa The target audience of the book is scholars of Educational Leadership The research reported in the chapters draw on a wide range of methodologies including empirical survey research questionnaires and interviews critical literature surveys and the comparative method **Delivering Entrepreneurship Education in Africa** Chux Gervase Iwu, Richard Shambare, 2023-12-14 Delivering Entrepreneurship Education in Africa brings together a collection of academic studies that offer an in depth analysis of the current state of entrepreneurship education in Africa The chapter authors engage discussions on how to make entrepreneurship education an attractive field of study for African students **A scholarly inquiry into disciplinary practices in educational institutions** Connie B. Multidisciplinary Perspectives on Grit Llewellyn Ellardus van Zyl, Chantal Olckers, Leoni van der Vaart, 2021-02-16 This volume provides a multi disciplinary perspective on grit, its measurement, manifestation and development. Specifically it provides a comprehensive and balanced response to critiques associated with the construct within the contemporary positive psychological literature. These critiques revolve around the lack of consensus in the conceptualisation, measurement and management of grit as well as consensus on its difference from other psychological constructs such as conscientiousness, diligence or determination. Therefore this volume thoroughly reappraises and consolidates the nature, function, measurement and implications of grit in order to effectively advance the science of achievement. It looks at grit scales developed in various countries and evaluates the concept in various aspects of life from work performance to sports. Written by a team of multi disciplinary experts in fields ranging from neuroscience, sociology and education to human resource management and psychology, this volume firmly positions grit within the discipline of positive psychology's nomological lexicon.
