3 marks: Wundt's role discussed in detail with clarity and coherence, and with appropriate use of terminology.

2 marks: Wundt's role discussed with some clarity and / or coherence.

Possible discussion points:

- first to open a laboratory designated to the scientific study of psychological enquiry under controlled conditions facilitating accurate measurements and replication
- focus was on trying to understand psychological processes of perception etc and structuralism rather than philosophical or biological processes
- he later recognised that higher mental processes were difficult to study using his procedures and this encouraged others to look for more appropriate methods and techniques, paving the way for approaches such as scanning
- introspection still used today in areas such as therapy and studying emotional states demonstrating its value as one way mental processes can be investigated
- issues of determinism and predictability could be presented as a strength or limitation.

Credit other relevant discussion.
