November 2013 General Paper 2:

Democratic Sustainability in a New Era of Localism John Stanton, 2014-06-27 Change and development are going on all around us. On both an international platform as well as at the local governmental and community level, governments, decision makers, and policy makers constantly strive to improve the world in which we live, seeking to make it better and to improve quality of life. This book focuses on such development in the context of localism in the UK. It strips the principle of local sustainability down to its constituent parts and considers the extent to which it can be said to be central to local life. As part of this, it presents the case for the importance of accountability and citizen participation in achieving objectives aligned with sustainability and illustrates the relationships that these principles share. On this foundation, it evaluates local government in the UK as well as examples of community-led regeneration initiatives and bodies and seeks to determine both the nature of their pursuit of sustainability and the extent to which accountability and citizen participation play a part in that pursuit. It shows that local sustainability is enhanced by accountability and citizen participation, those principles ensuring that local people can be central to the process. Whilst its evaluations of local democratic systems in the UK reveal certain issues as regards the extent to which this is reflected in practice, it at least demonstrates an enthusiasm and awareness of the important role that accountability and citizen participation can play in the process of local sustainability. The book is aimed at legal academics with relevance also to students in law, environmental politics, and sustainable development as well as those working in government policy and political practice.

Regulation in the European Electricity Sector Maciej Sokołowski, 2016-02-22 Since the very beginning of European integration, electricity has been within the legal sphere of the EU. Much of this is found within the binding European acts making up the framework of the Energy Packages. The established legal institutions have had a significant impact on the shape of the energy market in Europe. Nevertheless, the European energy market still seems to be developing as demonstrated by the current lively discussion about the state of the Energy Union. Regulation in the European Electricity Sector delves into European energy law and reflects on some of the primary issues related to the public legal impact on the European energy sector. The book offers a brief explanation of the background operation of the electricity sector as well as liberalisation within the area and traces the evolution of the EU's approach towards the issue of public law regulation within the electricity sector. Finally, the book presents an analysis of European and national laws, considering their interpretation and explores the future of public law regulation. Aimed at giving the reader a deep insight into a nature of the state's presence in the power sector, this book will be of great interest to students and scholars of EU energy law and policy.

ongoing Indian counter insurgency this study provides a set of conditions responsible for the groundswell of insurgencies in India and some recommendations to better formulate India's national security policy with regard to its counter insurgency responses. The study focuses on the national institutions responsible for formulating India's national security policy dealing with counter insurgency such as the Prime Minister's Office, the Cabinet Committee on Security, the National Security Council, the Ministry of Home Affairs and the Indian military apparatus. Furthermore, it studies how national interests and values influence the formulation of this policy and the overall success and/or failure of the policy to deal with armed insurgent movements. Notably, the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. Multiple cases of armed ethnic insurgencies in Assam, Manipur, Mizoram and Nagaland in the Northeast of India and the ideologically oriented Maoist or Naxalite insurgency affecting the heartland of India are analysed in depth to evaluate the Indian counter insurgency experience.
