Urban riverbanks are attractive locations and highly prized recreational environments The designs of urban river landscapes must fulfill a broad range of requirements flood control open space design and ecology are as a rule the three dominant themes and they must often be reconciled within a very restricted space The river must be understood as a process governed by changing water levels shifting seasons erosion and sedimentation the river environment is not a static entity but constantly changing the design must be flexible and take this into account This book is the product of a multi year study that subjected more than fifty Western European projects to a comparative analysis The result is a systematic catalog of effective strategies and innovative design elements First designers and planners are given an overview of the broad and varied spectrum of design possibilities The book s process oriented approach is especially helpful where the focus is on long term sustainable measures The publication consists of two linked volumes that enable the reader to consult the systematic catalog and the case study section side by side The easy to navigate structure and an extensive glossary provide further guidance while the work s highly distinctive design makes it visually appealing as well and invites the reader to leaf through and explore it The Source of the River Douglas S. Massey,Camille Z. Charles,Garvey Lundy,Mary J. Fischer,2011-06-27
African Americans and Latinos earn lower grades and drop out of college more often than whites or Asians Yet thirty years after deliberate minority recruitment efforts began we still don t know why In *The Shape of the River* William Bowen and Derek Bok documented the benefits of affirmative action for minority students their communities and the nation at large But they also found that too many failed to achieve academic success In *The Source of the River* Douglas Massey and his colleagues investigate the roots of minority underperformance in selective colleges and universities They explain how such factors as neighborhood family peer group and early schooling influence the academic performance of students from differing racial and ethnic origins and differing social classes Drawing on a major new source of data the National Longitudinal Survey of Freshmen the authors undertake a comprehensive analysis of the diverse pathways by which whites African Americans Latinos and Asians enter American higher education Theirs is the first study to document the different characteristics that students bring to campus and to trace out the influence of these differences on later academic performance They show that black and Latino students do not enter college disadvantaged by a lack of self esteem In fact overconfidence is more common than low self confidence among some minority students Despite this minority students are adversely affected by racist stereotypes of intellectual inferiority Although academic preparation is the strongest predictor of college performance shortfalls in academic preparation are themselves largely a matter of socioeconomic disadvantage and racial segregation Presenting important new findings *The Source of the River* documents the ongoing power of race to shape the life chances of America s young people even among the most talented and able *Under the Volcano.
