

SpotPass™

The SpotPass feature allows the Nintendo DS system to automatically communicate with a nearby wireless LAN access point, enabling it to connect to the Internet and transmit a variety of data. The system can also do this while playing a game or in Sleep Mode (power is on, but the system is closed).

The Notification LED indicates the status of the system (see page 10).

NOTE: Data received via SpotPass is stored on the DS Card.

To connect to a wireless LAN access point, you will need to configure the Internet settings for your Nintendo DS system (see page 44).

- SpotPass may not be available depending on the play environment or the software you are using. SpotPass is also not available during local communication (see page 23), or when playing Nintendo DS or Nintendo DSi software.
- The Notification LED may not light for some types of data.

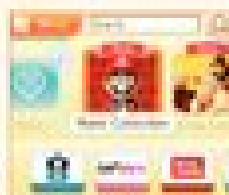

Keeping your system charged using the Nintendo DS charging cradle (sold separately).

When not in use, you can keep the system in the charging mode so it stays fully charged. This accessory may be ordered through Nintendo's website at store.nintendo.com (USA/Canada only) or by calling Customer Service at 1-800-251-1700.

Nintendo eShop

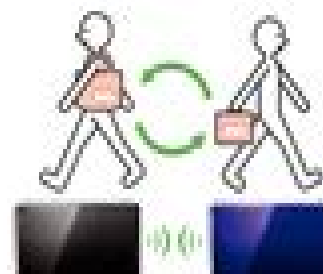

You can connect to Nintendo eShop through the Internet and view information and videos about software, or download software to play on your system.

NOTE: If broadband wireless network connection is required to connect to the Internet, see page 44 for more information on setting up a connection.

StreetPass™

The StreetPass feature allows the Nintendo DS system to automatically search for and communicate with other Nintendo DS systems and to exchange information with them as you walk by.

If the system is in Sleep Mode (turned on but closed) or certain other modes, and you pass someone who has enabled StreetPass for the same software, you will exchange game data with them. (If you don't want to allow data exchange, you can disable wireless communication.)

If StreetPass is successful...

The Notification LED will light green if StreetPass data has been exchanged and a message will appear on your notification bar (see page 18 for more information on the Notifications application and incoming messages).

StreetPass settings for Nintendo DS software are used on the system. The data you transmit with StreetPass varies depending on the software using the feature. Each software program has its own StreetPass settings.

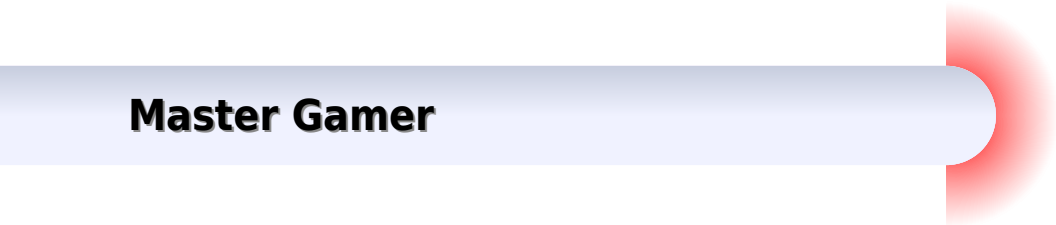

- Up to 12 Nintendo DS software titles can use StreetPass simultaneously.
- Some Nintendo DS and Nintendo DSi software have a similar feature called tag mode. (The name for this mode may vary depending on the game you are playing.) Tag mode is only active when the system is in Sleep Mode while the software and tag mode feature are in use. When tag mode is in use, the StreetPass feature will not work for Nintendo DS software.
- If you turn the power off or disable wireless communication, the system cannot communicate.
- StreetPass may not be available depending on the play environment or the software you are using. StreetPass does not work if you are connected to the Internet or are using local communication (see page 23).

Downloadable software

- **Nintendo DS Download Software**—Some Nintendo DS software is available exclusively through Nintendo eShop. You can also download certain Game Card-based titles rather than purchasing the Game Card.
- **Virtual Console**—You can download games originally released on platforms prior to Nintendo DS, such as Game Boy™ and Game Boy Color.
- **Nintendo DSiWare**—You can download Nintendo DSiWare—games originally released for the Nintendo DSi system.
