Crypto Asset Investing in the Age of Autonomy Jake Ryan, 2020-12-22 Competition the drive for efficiency and continuous improvement ultimately push businesses toward automation and later towards autonomy If a business can operate without human intervention it will minimize its operational cost If Uber can remove the expense of a driver with an autonomous vehicle it will provide its service cheaper than a competitor who can't If an artificially intelligent trading company can search find and take advantage of some arbitrage opportunity then it can profit where its competitors cannot A business that can analyze and execute in real time without needing to wait for a human to act is a business that will be able to take advantage of brief inefficiencies from other markets or businesses This trend following a thesis that is based on 100 years of proven economic theory Short wave economic cycles those 5 to 10 year cycles are driven by credit but the long wave economic cycles those 50 to 60 year cycles are driven by technological revolution We've had 5 cycles over the past 200 years with the last wave the Age of Information Telecommunications We've seen evidence that a new cycle has begun Technological revolutions come by way of a cluster of new innovations About a decade ago you started to see AI robotics and IoT sensors delivering on automation That's been powerful but not transformational It does not force businesses to fundamentally change how they do business The last piece of the puzzle was cryptocurrency because it allows us to process and transfer economic value without human intervention Soon there will be a global race to build autonomous

operations Businesses and organizations without autonomous operations simply will not be able to compete with those that do because autonomy is the ultimate competitive advantage Crypto is the mechanism that will accrue value from being the infrastructure for the next digital financial revolution Crypto Asset Investing lays out a case that we've begun a new technological revolution similar to the Internet Age of the 1990's Artificial intelligence the Internet of Things robotics and cryptocurrency are converging to deliver on a new age what I call the Age of Autonomy Understanding the transformation that's taken place before anyone else can yield enormous investment opportunity In this book you'll learn how and why to invest in crypto assets
