Wollack, 2016-10-26 The rising reliance on testing in American education and for licensure and certification has been accompanied by an escalation in cheating on tests at all levels Edited by two of the foremost experts on the subject the Handbook of Quantitative Methods for Detecting Cheating on Tests offers a comprehensive compendium of increasingly sophisticated data forensics used to investigate whether or not cheating has occurred Written for practitioners testing professionals and scholars in testing measurement and assessment this volume builds on the claim that statistical evidence often requires less of an inferential leap to conclude that cheating has taken place than do other more common sources of evidence This handbook is organized into sections that roughly correspond to the kinds of threats to fair testing represented by different forms of cheating In Section I the editors outline the fundamentals and significance of cheating and they introduce the common datasets to which chapter authors cheating detection methods were applied Contributors describe in Section II methods for identifying cheating in terms of improbable similarity in test responses preknowledge and compromised test content and test tampering Chapters in Section III concentrate on policy and practical implications of using quantitative detection methods Synthesis across methodological chapters as well as an overall summary conclusions and next steps for the field are the key aspects of the final section      *Black Educational Choice* Diana T. Slaughter-Kotzin, Howard C. Stevenson, Edith G. Arrington, Deborah J. Johnson, 2011-11-08 This important book provides African American parents with the knowledge to diversify K 12 school choices beyond traditional neighborhood public schools in order to optimize the educational chances of their own children and it will help educators and policymakers to close the black white academic achievement gap throughout America Closing the K 12 achievement gap is critical to the future welfare of African American individuals families and communities and to the future of our nation as a whole The black white academic achievement gap the significant statistical difference in academic performance between African American students and their white peers is the single greatest impediment to achieving racial equality and social justice in America Black Educational Choice provides parents citizens educators and policymakers the critical knowledge they need to leverage the national trend toward increasing and diversifying K 12 school choice beyond traditional neighborhood public schools Parents can use this information to optimize the success of their own African American children while policymakers and educators can apply these insights to help close the black white academic achievement gap throughout America The book collects the interdisciplinary multi racial and multi ethnic perspectives of education experts to address the questions of millions of anxious African American families Would sending our children to a private school or a charter school significantly better their chances of closing the achievement gap and becoming successful individuals And if so what kinds of challenges would they likely experience in these alternative educational settings      Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing

Juvenile Justice Reform,2013-06-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of Reforming Juvenile Justice A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts
