The Roads to Congress 2014 Sean D. Foreman, Robert Dewhirst, 2015-10-30 The 2014 midterm congressional elections provided a view of the attitude of American voters in the sixth year of Barack Obama's presidency. This book provides insight about the formative aspects of the 2014 campaign season as well as in-depth coverage of key races for Congress. The first section has four chapters that cover the substance of topics that impacted this campaign cycle: the popularity and productivity of the 113th Congress, voter suppression laws passed in many states, the role of Super PACs and independent expenditures in the campaigns, and the use of social media by members of Congress running for reelection. Case studies follow the path of ten House and seven Senate races from inception to election postmortem. The chapters are narrative and provide analysis of an array of interesting and diverse contests from throughout the country. The authors provide succinct and highly readable chapters meant to illustrate the distinctive nature of the campaigns they are examining. Individual campaigns and elections are shown up close and be ready to compare and contrast because of the common format employed throughout the book. Taken together, the chapters reveal that the roads to Congress, while similar in so many ways, each follow a unique route to Capitol Hill.

BLS File of State, County, and Municipal Collective Bargaining Agreements, Fall 1977, 1978 *In Our Hands* Elizabeth Palley, Corey S. Shdaimah, 2014 Working mothers are common in the United States. In over half of all two

parent families both parents work and women's paychecks on average make up 35 percent of their families incomes Most of these families yearn for available and affordable child care but although most developed countries offer state funded child care it remains scarce in the United States And even in prosperous times child care is rarely a priority for U S policy makers In *In Our Hands The Struggle for U S Child Care Policy* Elizabeth Palley and Corey S Shdaimah explore the reasons behind the relative paucity of U S child care and child care support Why they ask are policy makers unable to convert widespread need into a feasible political agenda They examine the history of child care advocacy and legislation in the United States from the Child Care Development Act of the 1970s that was vetoed by Nixon through the Obama administration's Child Care Development Block Grant The book includes data from interviews with 23 prominent child care and early education advocates and researchers who have spent their careers seeking expansion of child care policy and funding and an examination of the legislative debates around key child care bills of the last half century Palley and Shdaimah analyze the special interest and niche groups that have formed around existing policy arguing that such groups limit the possibility for debate around U S child care policy Ultimately they conclude we do not need to make minor changes to our existing policies We need a revolution

ISCS 2013: Interdisciplinary Symposium on Complex Systems Ali Sanayei, Ivan Zelinka, Otto E. RöSSLer,2014-02-15 The book you hold in your hands is the outcome of the ISCS 2013 Interdisciplinary Symposium on Complex Systems held at the historical capital of Bohemia as a continuation of our series of symposia in the science of complex systems Prague one of the most beautiful European cities has its own beautiful genius loci Here a great number of important discoveries were made and many important scientists spent fruitful and creative years to leave unforgettable traces The perhaps most significant period was the time of Rudolf II who was a great supporter of the art and the science and attracted a great number of prominent minds to Prague This trend would continue Tycho Brahe Niels Henrik Abel Johannes Kepler Bernard Bolzano August Cauchy Christian Doppler Ernst Mach Albert Einstein and many others followed developing fundamental mathematical and physical theories or expanding them Thus in the beginning of the 17th century Kepler formulated here the first two of his three laws of planetary motion on the basis of Tycho Brahe's observations In the 19th century nowhere differentiable continuous functions of a fractal character were constructed here by Bolzano along with a treatise on infinite sets titled *Paradoxes of Infinity* 1851 Weierstrass would later publish a similar function in

1872 In 1842 Doppler as a professor of mathematics at the Technical University of Prague here first lectured about a physical effect to bear his name later And the epoch making physicist Albert Einstein while being a chaired professor of theoretical physics at the German University of Prague arrived at the decisive steps of his later finished theory of general relativity during the years 1911 1912 In Prague also many famous philosophers and writers accomplished their works for instance playwright Karel Capek coined the word robot in Prague robot comes from the Czech word robota which means forced labor

Decarceration Andrew T. Scull, 2014-11-20 Decarceration is a word which has not yet entered the dictionary But it is increasingly being used to designate a process with momentous implications for all of us It is shorthand for a state sponsored policy of closing down asylums prisons and reformatories Mad people criminals and delinquents are being discharged or refused admission to the dumps in which they have been traditionally housed Instead they are to be left at large to be coped with in the community We are told by those who run programs of this sort that keeping the criminal and the mentally disturbed in our midst is humane We are informed that it is a more effective means of curing or rehabilitating such people And miracle of miracles we learn that this approach is also cheaper With an alternative which embraces such an array of virtues who can be surprised to learn that mental hospitals are emptying faster and faster and that with each passing day the convicted felon's chances of going to prison grow more remote On closer examination it turns out that this whole enterprise is built on a foundation of sand The claim that leaving deviants at large cures or rehabilitates them is just that a claim Little or no solid evidence can be offered in its support Instead it rests uneasily on a cloud of rhetoric and wishful thinking Most people's conception of the humane does not embrace placing senile men and women in the hands of rapacious nursing home operators or turning loose the perpetrators of violent crimes under conditions which guarantee that they will receive little or no supervision Yet as decarceration has been implemented this is what has been happening Much of the time it appears as if the policy makers simply do not know what will happen when their schemes are put into effect Nor do they seem very concerned to find out Often they do not even know where those they have dumped back on the rest of us are to be found
