**Occupations and Society (Routledge Revivals)** David Dunkerley, 2013-10-18 Work and the nature of occupations are matters of central concern to the sociologist. In this basic introduction to the sociology of professions, occupations and work first published in 1975, David Dunkerley provides a theoretical basis for the study of a subject that previously had a strong empirical tradition. Drawing on comparative literature, the author analyses the structure of occupation, the processes of occupational life and how occupations are related to the predominant culture. The effects of occupations on the non-work lives of individuals are also examined and extended examples are given of managerial and scientific occupations as case studies.

**Industrial Society (Routledge Revivals)** Richard Scase, 2015-06-03 Any study of contemporary industrial societies must take into account the role of power, ideology and class and the degree to which these determine the development of social structures. This book, first published in 1977 and based on a selection of eleven papers given at a conference of the British Sociological Association, focuses upon aspects of continuity and change in modern society, comparing and contrasting dimensions of class cleavage and control in capitalist and socialist societies. This book is key reading for students of both sociology and business studies.

**Professions and Power (Routledge Revivals)** Terence J. Johnson, 2016-06-17 First published in 1972, this book rejects as inadequate the trait and functionalist theories of the professions and instead presents an alternative framework to analyse the contemporaneous occupational change in industrial societies. The author describes how occupational specialisation creates varying degrees of social distance between producers and consumers of goods or services; thus, several institutions of control have developed: collegiate, corporate or oligarchic patronage, mediative. The author looks at the social conditions necessary for the development of these methods of control and the apparent decline of professionalism in both developed and undeveloped societies.

**Pukhtun Economy and Society (Routledge Revivals)** Akbar Ahmed, 2013-04-15 First published in 1980, this groundbreaking Routledge Revival is a reissue of an original and authentic anthropological account of Pukhtun society by Professor Akbar Ahmed. Combining extensive fieldwork data collected among the Mohmand tribe in the Northwest Frontier Province of Pakistan with historical and literary sources, Professor Ahmed's study seeks to construct an ideal type model of Pukhtun society based on the ideal Code of the Pukhtuns and to analyse the conditions of its maintenance and transformation. The author's thesis is that this

ideal model exists within Pukhtun society when interaction with larger state systems is minimal and in poor economic zones In this way he posits an opposition between the Tribal Agencies along the border with Afghanistan where ecological conditions are poor and state influence minimal and the Settled Areas under state administration where Pukhtun society is forced away from its ideals

emphasis had been on individual enterprise and initiative with the number of small firms increasing rapidly This was reflected in the growth in the number of specialist studies analysis small firm revivalism Small Business and Society clarifies the issues and debates that surround the small business and its place in society In particular the complex nature of its social role is examined on the one hand the entrepreneur can be seen as the innovator exploiting free market capitalism to strengthen the economy on the other employment conditions and industrial relations are said to suffer Moreover the growing importance of green issues now brings into question the extent to which the small firm benefits the environment This book will be of interest to students of business and sociology

*Western Sociologists on Indian Society (Routledge Revivals)* G. R. Madan, 2010-01-20 Of the five major sociologists whose views on Indian society are assessed in this work originally published in 1979 Marx and Weber made a special study of the subject and had something definite to say about the future of Indian society Herbert Spencer was primarily concerned with the effects of colonial rule on India's progress while Durkheim and Pareto tended to observe Indian society from a comparative point of view However as this study shows all five sociologists touched on two special aspects of Indian society Indian religion and the caste system The other features of Indian society which they discussed in their various writings range widely from marriage and family structure through village communities and the social structure of cities to political organization the educational system economic conditions and the future progress of Indian society Dr Madan demonstrates the correctness of Marx's contention that the political subordination of India was the one great hindrance to the future progress of Indian Society He points out though that Marx failed to see clearly the effects of the caste system on economic development and shows that this aspect was more correctly assessed by Max Weber On the other hand in Dr Madan's view Weber's observation that Indian religion was otherworldly and therefore a great obstacle to progress in Indian society lacked incisiveness By focusing on a neglected aspect of the writings of five of the great figures in sociology the book gives a new insight into their work and at the same time highlights many hitherto unrecognized facets of India's complex social structure
