a significant economic toll on individuals their families and society because of longer hospital stays ICU admissions rehospitalizations and lost wages In the United States direct health care costs of hospitalized older adults with delirium are significantly higher than hospitalized patients without delirium even after adjusting for demographic and clinical factors The American Psychiatric Association Practice Guideline for the Prevention and Treatment of Delirium reviews current evidence based nonpharmacological and pharmacological interventions to prevent or treat delirium in adults In addition it includes statements related to assessment and treatment planning which are an integral part of patient centered care The guideline describes approaches to implementing recommendations and suggestions in clinical practice By providing up to date knowledge the guideline aims to help clinicians feel more confident in preventing recognizing and treating delirium thereby improving the care and well being of their patients Evidence tables literature search results clinical questions and more for this guideline can be found in the online appendixes
