Ransford Tetteh, 2014-03-29 **Transformation of Higher Education Institutions in Post-Apartheid South Africa**
Chaunda L. Scott, Eunice N. Ivala, 2019-02-21 This book outlines successful transformation strategies and efforts that have been developed to assist the South African higher education system in moving beyond its post apartheid state of being. Through case studies authored by South African higher education scholars and scholars affiliated with South African institutions, this book aims to highlight the status of transformation in the South African higher education system, demonstrate the variety of transformation initiatives used in academic institutions across South Africa, and offer recommendations to further advance this transformation. Written for scholars and advanced students of higher education in international settings, this volume aims to support quality research that benefits the demographic composition of South African academics and students and offers lessons that can inform higher education transformation in similarly multicultural societies. Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08 The 2010 astronomy and astrophysics decadal survey *New Worlds New Horizons* in Astronomy and Astrophysics laid out an exciting portfolio of recommended activities to guide the agencies' research programs over the period 2012–2021. The newly constituted Committee on Astronomy and Astrophysics (CAA) is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington, D.C. on March 28–30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting, the CAA received a question from NASA about an upcoming Small Explorer (SMEX) mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX-sized mission to justify a SMEX Announcement of Opportunity (AO) in 2018 or 2019 as is currently planned. *Elite Education* Claire Maxwell, Peter Aggleton, 2015-10-05 *Elite Education: International Perspectives* is the first book to systematically examine elite education in different parts of the world. Authors provide a historical analysis of the emergence of national elite education systems and consider how recent policy and economic developments are changing the configuration of elite trajectories and the social groups benefiting from these. Through country-level case studies, this book offers readers an in-depth account of elite education systems in the Anglophone world in Europe and in the emerging financial centres of Africa, Asia, and Latin America. A series of commentaries highlight commonalities and differences between elite education systems and offer insights into broader theoretical issues with which educationalists, researchers, and policy makers are engaging. With authors including Stephen J. Ball, Donald Broady, Rubén Gaztambide Fernández, Heinz Hermann Krüger, Maria Alice Nogueira, Julia Resnik, and Agnès van Zanten, the book offers a benchmark perspective on issues frequently glossed over in comparative education.

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation **Thermal Energy** Yatish T. Phosphorus Along the Soil-Freshwater-Ocean Continuum Barbara J. Cade-Menun, Solange Duhamel, Rosalind J. Dodd, Christian Lønborg, Chris T. Parsons, William D. Taylor, 2019-05-15 Phosphorus P is an essential element for all organisms However there is a P paradox whereby P concentrations considered deficient in some environments such as in agricultural soils are considered excessive in water where they trigger eutrophication Ensuring adequate P for crop production while minimizing water quality degradation requires consideration of the P continuum from soils to freshwater and oceans It also requires an international interdisciplinary approach to monitoring and scientific research This eBook brings together P studies in soil science lakes rivers estuaries and oceans with 74 authors from 12 countries in Asia Europe and North America The papers assembled here provide important new information to address knowledge gaps cover P forms and cycling in soil and water and identify key priorities for future research Thus the papers assembled here provide current and interdisciplinary information about P forms and their cycling along the soil freshwater ocean continuum which is essential for environmentally sustainable P use
