Environmental Protection Agency. Library Systems Branch, 1973 *Humanism in Islam* Marcel Boisard, 1987-10-01 Humanism in Islam The West's generalized fear and lack of intellectual honesty toward Islam prevent it from recognizing the wealth of benefits Islam bestows on mankind Demonstrates that Islam and Islamic law can make a vital contribution to the protection of human rights worldwide Freed from European colonial tutelage and representing almost a billion souls grouped in approximately forty states the Muslims have entered the international scene without really having any other choice but to imitate the existing institutions or to accept provisions in which they historically speaking have had no participation Nevertheless the process of modernization has not lured the Muslims away from the remembrance of a glorious heritage On the contrary wherever the movement of Westernization has been too brutal it has run into a religious challenge Islam thus reappeared as one of the grand moral and political forces of the contemporary world Humanism in Islam has not been drafted only out of sympathy for the Muslims but also on account of historical evidence Islamic civilization was the first to outline clear and mandatory provisions for protecting the destiny of man and society and for creating order in the ties between peoples As to its general character this work attempts to encourage a certain Western public to abandon its ethnocentrism in order to better understand the legitimate aspirations expressing themselves sometimes in chaos of the present day Muslims Military Review, 2017 **"Grace Abounds More": Balthasar's Eschatological Universalism in Dialogue** Joshua R. Brotherton, 2023-12-04 The problem of eternal damnation is one that should trouble all believers and impels many to seek answers to fundamental questions outside of the Church For this reason theologians with a missionary heart of the last century or more from across the ecclesial spectrum have sought to refashion the gospel in our own estranged image In dialogue with one of the leading figures of this movement Joshua Brotherton tackles the question of the plausibility that all will be saved Sympathetic to their cause this volume seeks to revise the way in which they envision the reconciliation of divine love and moral evil *Logic, Epistemology, and Scientific Theories - From Peano to the Vienna Circle* Paola Cantù, Georg Schiemer, 2024-01-03 This book provides a collection of chapters on the development of scientific philosophy and symbolic logic in the early twentieth century The turn of the last century was a key transitional period for the development of symbolic logic and scientific philosophy The Peano school the editorial board of the *Revue de Métaphysique et de Morale* and the members of the Vienna Circle are generally mentioned as champions of this transformation of the role of

logic in mathematics and in the sciences The scholarship contained provides a rich historical and philosophical understanding of these groups and research areas Specifically the contributions focus on a detailed investigation of the relation between structuralism and modern mathematics In addition this book provides a closer understanding of the relation between symbolic logic and previous traditions such as syllogistics This volume also informs the reader on the relation between logic the history and didactics in the Peano School This edition appeals to students and researchers working in the history of philosophy and of logic philosophy of science as well as to researchers on the Vienna Circle and the Peano School
