Glenn, 2009-03-15 A timely collection of essays by prominent scholars in the field on the past present and future of rhetoric instruction From Isocrates and Aristotle to the present rhetorical education has consistently been regarded as the linchpin of a participatory democracy a tool to foster civic action and social responsibility Yet questions of who should receive rhetorical education in what form and for what purpose continue to vex teachers and scholars The essays in this volume converge to explore the purposes problems and possibilities of rhetorical education in America on both the undergraduate and graduate levels and inside and outside the academy William Denman examines the ancient model of the citizen orator and its value to democratic life Thomas Miller argues that English departments have embraced a literary research paradigm and sacrificed the teaching of rhetorical skills for public participation Susan Kates explores how rhetoric is taught at nontraditional institutions such as Berea College in Kentucky where Appalachian dialect is espoused Nan Johnson looks outside the academy at the parlor movement among women in antebellum America Michael Halloran examines the rhetorical education provided by historical landmarks where visitors are encouraged to share a common public discourse Laura Gurak presents the challenges posed to traditional notions of literacy by the computer the promises and dangers of internet technology and the necessity of a critical cyber literacy for future rhetorical curricula Collectively the essays coalesce around timely political and cross disciplinary issues Rhetorical Education in America serves to orient scholars and teachers in rhetoric regardless of their disciplinary home and help to set an agenda for future classroom practice and curriculum design

The Public Work of Rhetoric John M. Ackerman, David J. Coogan, 2013-03-15 The Public Work of Rhetoric presents the art of rhetorical techn as a contemporary praxis for civic engagement and social change which is necessarily inclusive of people inside and outside the academy In this provocative call to action editors John M Ackerman and David J Coogan along with seventeen other accomplished contributors offer case studies and criticism on the rhetorical practices of citizen scholars pursuing democratic ideals in diverse civic communities with partnerships across a

range of media institutions exigencies and discourses Challenging conventional research methodologies and the traditional insularity of higher education these essays argue that civic engagement as a rhetorical act requires critical attention to our notoriously veiled identity in public life to our uneasy affiliation with democracy as a public virtue and to the transcendent powers of discourse and ideology This can be accomplished the contributors argue by building on the compatible traditions of materialist rhetoric and community literacy two vestiges of rhetoric s dual citizenship in the fields of communication and English This approach expresses a collective desire in rhetoric for more politically responsive scholarship more visible impact in public life and more access to the critical spaces between universities and their communities The compelling case studies in *The Public Work of Rhetoric* are located in inner urban and postindustrial communities where poverty is the overriding concern in afterschool and extracurricular alternatives that offer new routes to literate achievement in new media and digital representations of ethnic cultures designed to promote chosen identities in neighborhoods and scientific laboratories where race is the dominant value and in the policy borderlands between universities and the communities they serve Through these studies and accounts the contributors champion the notion that the public work of rhetoric is the tough labor of gaining access and trust learning the codes and histories of communities locating the situations in which rhetorical expertise is most effective and in many cases jointly defining the terms for gauging social change

The Rhetoric of Cicero in its Medieval and Early Renaissance Commentary Tradition Virginia Cox, John Ward, 2018-11-12 This multi authored volume by an authoritative team of international scholars examines the transmission of Ciceronian rhetoric in medieval and early Renaissance Europe concentrating on the fortunes in particular of the two dominant classical rhetorical textbooks of the time Cicero s early *De inventione* and the contemporary pseudo Ciceronian *Rhetorica ad Herennium* The volume is unprecedented in range and depth as a presentation of the place of classical rhetoric in medieval culture and will serve to revise views of a period seen until recently as largely indifferent to the values of eloquence The main body of the volume is composed of a series of ground breaking studies of the relationship between Ciceronian rhetoric and a wide range of intellectual traditions and cultural practices including dialectic law conduct theory memory poetics and practical composition teaching preaching *ars dictaminis* and political oratory Also included are important contextualizing essays on the commentary tradition of the Ciceronian *juvenilia* on the textual history and manuscript transmission of Cicero s rhetorical works and on the Latin and vernacular traditions of Ciceronian rhetoric in Italy The volume concludes with an annotated appendix of illustrative texts containing extracts from the commentary tradition on Ciceronian rhetoric most of which have not been previously available in print

Information Theory , Introduction to Classical Legal Rhetoric Michael H. Frost, 2017-03-02 Lawyers law students and their teachers all too frequently overlook the most comprehensive adaptable and practical analysis of legal discourse ever devised the classical art of rhetoric Classical analysis of legal reasoning methods and strategy is the foundation and source for most modern theories on the topic Beginning with Aristotle s *Rhetoric* and culminating with Cicero

s De Oratore and Quintilian s Institutio Oratoria Greek and Roman rhetoricians created a clear experience based theoretical framework for analyzing legal discourse This book is the first to systematically examine the connections between classical rhetoric and modern legal discourse It traces the history of legal rhetoric from the classical period to the present day and shows how modern theorists have unknowingly benefited from the classical works It also applies classical rhetorical principles to modern appellate briefs and judicial opinions to demonstrate how a greater familiarity with the classical sources can deepen our understanding of legal reasoning *Philodemus on Rhetoric Books 1 and 2* Clive Chandler,2017-09-25 The Epicureans were notorious in antiquity for denigrating most forms of civic participation and for rejecting those cultural activities such as poetry music and rhetoric which are broadly labelled paideia In this as in all else they ostensibly took their cue from Epicurus and the other founders of the School In contrast to this the Epicurean Philodemus who lived and wrote in Italy in the first century B C presents an interesting case For a substantial portion of his surviving work is preoccupied with investigations into this paideia and with demonstrating how an orthodox Epicurean is to approach them This book selects one of those investigations the first two books of Philodemus On Rhetoric An annotated translation is provided of the most recent edition of this text Longo Auricchio 1977 which is followed by a series of essays which aim to clarify Philodemus conception of and approach to the problem of rhetoric for Epicureans and in particular the way he manages citations from the works of the founders to support his arguments against other Epicureans who take a different view The book constitutes a very helpful guide to this fragmentary and difficult text *Secular Vocations* Bruce Robbins,1993-07-17 During the 1980s university based intellectuals came under heavy fire from both radicals and conservatives They were accused by the former of betraying their public duty as general critics of society and by the latter of promulgating radical ideologies and corrupting the young In this work the author counters both left and right arguing that the professionalization of literary study was inevitable and fortuitous Robbins undertakes close studies of such figures as Edward Said Fredric Jameson and Raymond Williams while considering the major trends in contemporary cultural studies and giving significant attention to relevant developments in such disciplines as ethnology and sociology *Secular Vocations* ranges over materials from Britain France and the US knitting them together in a synthesis that places in bold relief many of the major controversies in contemporary intellectual life It concludes with a plea for what Robbins calls comparative cosmopolitanism to displace the more militantly particularist projects that have come to dominate the human sciences **Redescriptions** Kari Palonen,2005 With nine articles neatly combining contemporary theorizing and historical approaches to political thought and concepts this volume of *Redescriptions* draws attention to two topics several of the contributions share In these articles rhetoric serves both as a style of political theorizing and as a medium of conceptual change In addition the relationship of political thought and practice to religion is discussed as a subject matter as well as in the sense of a cultural heritage that is used by the political agents for contemporary purposes **Introduction to Logic** Jess Drake,2018-05-30 Logic originally meaning e the worde or e what is

spokene is generally held to consist of the systematic study of the form of arguments A valid argument is one where there is a specific relation of logical support between the assumptions of the argument and its conclusion There is no universal agreement as to the exact scope and subject matter of logic but it has traditionally included the classification of arguments the systematic exposition of the logical form common to all valid arguments the study of inference including fallacies and the study of semantics including paradoxes Historically logic has been studied in philosophy and mathematics and recently logic has been studied in computer science linguistics psychology and other fields The book is about the logic and talks about various aspects of it such as general character of the enquiry argument from analogy mathematical reasoning etc This book will prove to be very useful for the people interested in logic as well as the students of logic *Teaching First-Year Communication Courses* Pat J. Gehrke, 2018-07-26 In this book eleven teacher scholars of communication provide a robust study of the challenges and opportunities facing those who teach first year communication courses The first half of the volume offers paradigmatic analyses including a survey of the ecology of the first year course a plea to integrate our first year courses into our research agendas a study of the gap between scholarship and pedagogy within rhetoric a proposal for seven core competencies to unify the various first year communication courses and an argument for a critical communication paradigm The second half details innovations in classroom practice such as the teaching techniques of social justice pedagogues team based learning as a model for the public speaking course response and feedback techniques in teaching public speaking at the University of Copenhagen teaching online speech as a new course focused on the unique challenges of digital communication and the role of oral interpretation and performance classes in the first year curriculum Finally this volume concludes with the editor s manifesto for teaching public speaking *Queering Romantic Engagement in the Postal Age* Pamela VanHaitsma, 2019-09-18 2020 Winifred Bryan Horner Book Award Honorable Mention from the Coalition of Feminist Scholars in the History of Rhetoric and Composition Romantic letters are central to understanding queer history Debates about letters of romantic friendship however too often reduce them to unstudied expressions of heartfelt feeling In *Queering Romantic Engagement in the Postal Age* Pamela VanHaitsma shows how the genre should be understood as a learned form of rhetoric VanHaitsma argues that epistolary instruction in the nineteenth century United States shaped civic engagement in predictably heteronormative ways even as it opened up possibilities for queer rhetorical practices Her archival study draws on writings whose authors diverse by gender race class and education all developed ways of queering cultural norms and generic conventions in their same sex relationships VanHaitsma theorizes a new concept of rhetorical education for romantic engagement to account for the significant yet understudied role of such training in inventing both civic and romantic life **The Handbook of Communication Ethics** Amit Pinchevski, Patrice M. Buzzanell, Jason Hannan, 2024-12-02 The second edition of this handbook offers a thoroughly updated overview of the different approaches and perspectives in communication ethics today Extending the path paved by its predecessor this handbook includes new

issues and concerns that have emerged in the interim from environmentalism to artificial intelligence from disability studies to fake news It also features a new structure comprised of three sections representing a wide array of communication ethics traditions contexts and debates Rather than focusing exclusively on a subset of ethics such as interpersonal communication rhetoric or journalism as do other handbooks of ethics in communication this collection provides a valuable resource for those who seek a broader basis on which to study communication ethics This handbook is a must read for faculty graduate students and advanced undergraduate students in all areas of communication studies as well as in neighboring disciplines such as rhetoric media studies sociology political science cultural studies and science and technology studies
