1. Read the report and answer the questions:

Rhino poaching is increasing.

A bloody battle rages between government and the mafia-poaching of rhinos. About 250 rhinos were hunted in 2010. "Traffic", a network conservation market, the company that monitoring living natural resources, had earlier indicated that poaching in 2008 had dramatically increased. This is attributed to a rising demand for rhino horn demand in Asian markets. The selling- price of rhino horn is up to R429 000. In 2005 a Vietnam government official claimed rhino horn healed him from cancer. In China rhino horn is still in used in traditional medicine. 16th Century Li shih Chen a pharماسist wrote that rhino horn could heal snake-bite, headache and vomiting.

Stop poaching!

Suggestions: The rhino's horn must be sawn off when they are young. Technology can also be used to implant a "Pro Tag Device" in the horn. The rhino's movement pattern can be followed and if there is a change there will be an alarm in form as a SMS message, being sent to the control system. The law enforcers say the punishment for poachers must be imprisonment and not be fined. More armed patrols and resources are required to stop poachers.
