Shared Governance for Sustainable Working Landscapes Timothy M. Gieseke, 2016-08-05. Sustaining our agricultural landscapes is no longer just a technical, scientific, or even political problem, but it has evolved into a socially complex, so-called wicked problem of conflicting social governance and economics. This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse, and the transactions costs remain high and multiple. Using Uber-like business platform technology and a shared governance model, a symbiotic demand for environmental benefits is created. Enabling multi-sector transactions for environmental benefits, this platform innovation would remedy the tragedy of the commons, the economic nemesis to achieving landscape sustainability. In a nutshell, to sustain our agricultural landscapes, a transdisciplinary approach supported by a shared governance model housed within a multi-sided platform is needed. This book introduces an assessment framework identifying governance actors, styles, and ratios for socio-ecological systems. The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks. It is aimed to anyone involved in sustainability science, agricultural policy planning, or integrated landscape design.

Transparent Lobbying and Democracy Šárka Labouťková, Vít Šimral, Petr Vymětal, 2020-02-04. The authors come up with some innovative tools, namely the Catalogue of transparent lobbying. They look at and evaluate the impact on both key stakeholders: lobbyists and targets of lobbying, monitoring of lobbying activities, and sanctioning for breaches of rules. This tool holds out benchmarking capacity of sound framework for understanding of lobbying in the context of democracy, legitimacy of decision making, and accountability. David Ondrka, member of global Board of Transparency International, head of Transparency International Czech Republic. *Transparent Lobbying and Democracy* provides a comprehensive view into the phenomenon of lobbying. As a well-established scientist specializing in democracy, civil society, and the public sphere, I see it as a useful and enriching contribution to the debate on lobbying, its necessary transparency, and its role in the democratization process. This book has the potential to reach an international audience of experts and interested lay persons and both complement and compete with publications on similar issues. Karel B. M. Mller, University of Economics in Prague, Czech Republic. This book deals with the current, as yet unsolved problem of transparency of lobbying. In the current theories

and prevalent models that deal with lobbying activities there is no reflection of the degree of transparency of lobbying mainly due to the unclear distinction between corruption lobbying in general and transparent lobbying This book provides a perspective on transparency in lobbying in a comprehensive and structured manner It delivers an interdisciplinary approach to the topic and creates a methodology for assessing the transparency of lobbying its role in the democratization process and a methodology for evaluating the main consequences of transparency The new approach is applied to assess lobbying regulations in the countries of Central Eastern Europe and shows a method for how lobbying in other regions of the world may also be assessed
