Arabic Dialectology Enam al- Wer,Rudolf Erik de Jong,2009 Much of the insight in the field of Arabic linguistics has for a long time remained unknown to linguists outside the field Regrettably Arabic data rarely feature in the formulation of theories and analytical tools in modern linguistics This situation is unfavourable to both sides The Arabist once an outrider has almost become a non member of the mainstream linguistics community Consequently linguistics itself has been deprived of a wealth of data from one of the world s major languages However it is reassuring to witness advances being made to integrate into mainstream linguistics the visions and debates of specialists in Arabic Building on this fruitful endeavour this book presents thought provoking new articles especially written for this collection by leading scholars from both sides The authors discuss topics in historical social and spatial dialectology focusing on Arabic data investigated within modern analytical frameworks
