However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil The Canadian public had lost confidence in its designers students were forced to study abroad to secure a first class education professional rivalry was unscrupulous architectural competitions a scandal American architects and their architecture were the fashion These things changed but not before the world of the Canadian architect had been turned on its head replaced by one which resembled the world of contemporary architects with professional organisations regulated standards formalised education centred in the universities and the belief that Canadian architecture should reflect local climates culture and geography Kelly Crossman provides the first analysis of this period Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s he traces the rise of professionalism as an idea and architectural nationalism as a goal His analysis is more a history of architectural ideas than a survey of forms It places the architecture of these years in an historical and ideological context demonstrating that it developed with its own logic in response to national and international factors During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen the role of the architect in industrialised society the need to accommodate and integrate applied science and the need to express their own and their country s personality in architectural form By the beginning of this century they had begun to find their own voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture *Buttress's World Guide to Abbreviations of Organizations* L. Pitman, 2012-12-06 The previous edition of this directory extended its coverage of the Far East Australasia and Latin America areas previously under represented For this new edition emphasis has been given to increasing the number of entries for organizations from Britain the United States and Australia and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union The number of entries included has gone up to over 68 000 of which over 9 000 are new or amended Cross references from defunct organizations in the previous edition have been deleted and references indicated by ex and now added for organizations which have changed their name since the previous edition As before the range of organizations included is broad and only purely local organizations have been excluded This directory therefore lists official and unofficial organizations national and international on all Subjects political economic and social Acronyms of parent bodies of subsidiary organizations are given where

appropriate and equivalencies are used to link acronyms in different languages for the same organization Further information about the organizations listed can be found in the sources listed in the bibliography I would like to thank Henry Heaney and Graeme Mackintosh for their advice and David Grinyer for his technical support L M Pitman Bibliography Adams R ed 1993 Centres Bureaux A Directory of UK Concentrations of Effort Information and Expertise 2nd edn CBD Research Beckenham Barrett IK 1993 Encyclopedia of Women s Associations Worldwide Gale London

Finding Your Seat at the Table Susan M. Harnett, Laureen P. Cantwell-Jurkovic, 2022-02-19 Service on Institutional Review Boards IRB and Institutional Animal Care and Use Committees IACUC is an uncommon activity for librarians Even librarians who participate in institutional research activities in a supportive capacity or conduct their own original research as scholars themselves and are familiar with the IRB IACUC research approval process they may hesitate to participate more fully with these boards There may be a perception that the work of the IRB and IACUC is too scientifically complex for librarians without an appropriate background Library administrators may not advocate for librarian inclusion on the board for fear of additional burdens on the librarian s time and university administrators might need some convincing of the librarian s suitability to perform this work This book provides librarians with foundational knowledge of the IRB and IACUC describes the work of these important committees and expands librarians conceptualization and knowledge of opportunities to create services and partnerships through participation The book provides a progressively more comprehensive understanding of the work of these committees Parts I and II discuss IRB and IACUC respectively their

history functions and membership Part III highlights expanding roles for librarians on IRB and IACUC and in institutional research activities A special feature of this section describes the experiences of librarians in their own words who work with IRB or IACUC what they have learned how they have used their experiences to create partnerships and market library services and what role they see for libraries and librarians in institutional research Monthly Catalog of United States Government Publications, Cumulative Index United States. Swinbank,2012-12-06 This edition of over 60 000 entries including significantly more than 20% new or revised material not only updates its predecessor but also continues the policy of extending coverage to areas dealt with only sparsely in previous editions Special attention has been paid to the Far East Australasia and Latin

America in general and to the People's Republic of China in particular. The cross referencing between a defunct organization and its successor indicated by ex and now introduced into the last edition has been extended. Otherwise the policies adopted in previous editions have been retained. All kinds of organizations are included: international, national, governmental, individual, large or small, but strictly local organizations have been omitted. The subject scope includes activities of all kinds in the fields of commerce and industry, education, law, politics, public administration, religion, recreation, medicine, science and technology. The country of origin of a national organization is given in brackets unless it is the home country of the title language or can be deduced readily from the title itself. Acronyms of parent bodies of subsidiary organizations are also added in brackets. Equivalences are used to link acronyms in different languages for the same organization. A select bibliography guides the reader to specialist works providing more detailed information.

The Science of Beach Lifeguarding Mike Tipton, Adam Wooler, 2018-09-03. The World Health Organization's recently published Global Report on Drowning found that drowning is the third leading cause of unintentional injury death worldwide, making the information presented in this new book an important part of the global effort to reduce this health risk. Written by leading researchers and academics from around the world, *The Science of Beach Lifeguarding* focuses on the scientific evidence that underpins what is taught to and practised by beach lifeguards. It is the first book to pull together all the different areas involved in beach lifeguarding and evaluate their evidence base. An accessible and informative reference underpinned by the best current research, the book's key themes cover the context of beach lifeguarding, the physical environment in which lifeguards work, medical aspects, practical lifeguarding techniques, physiological standards for lifeguards, safety, education and future developments in beach lifeguarding. The book presents groundbreaking work quantifying the scientific rationale behind a universally accepted fitness standard. It supplies an in-depth examination of the risks and hazards associated with the beach environment, including rip currents and cold water immersion. The book includes a state-of-the-art review of drowning and a comprehensive chapter on first aid. Detailing the recently announced 2015 European Resuscitation Council Guidelines, this book is a must-have for beach lifeguards, beach lifeguard managers, search and rescue personnel, paramedics, sports scientists, health and safety practitioners and occupational health practitioners.
