Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *Guide to Software Verification with Frama-C* Nikolai Kosmatov, Virgile

Prevosto, Julien Signoles, 2024-07-09 Frama C is a popular open source toolset for analysis and verification of C programs largely used for teaching experimental research and industrial applications With the growing complexity and ubiquity of modern software there is increasing interest in code analysis tools at various levels of formalization to ensure safety and security of software products Acknowledging the fact that no single technique will ever be able to fit all software verification needs the Frama C platform features a wide set of plug ins that can be used or combined for solving specific verification tasks This guidebook presents a large panorama of basic usages research results and concrete applications of Frama C since

the very first open source release of the platform in 2008 It covers the ACSL specification language core verification plug ins advanced analyses and their combinations key ingredients for developing new plug ins as well as successful industrial case studies in which Frama C has helped engineers verify crucial safety or security properties Topics and features Gentle example based introduction to software specification and verification Wide panorama of state of the art specification and analysis techniques Step by step guide to develop your own tailor made analysis on top of the platform Inspiring success stories of Frama C deployment on industrial code More than 15 years of R D on analysis and verification of C code This book is firmly rooted on the practice of software analysis with numerous examples exercises and application guidelines As such it is particularly well suited for software verification practitioners wishing to deploy verification on their code as well as for undergraduate students with little or no experience in code analysis techniques More advanced sections on the theoretical underpinnings of the analyzers will be of interest for graduate students and researchers Nikolai Kosmatov is a Senior Researcher at Thales Research Technology France Virgile Prevosto is a Senior Researcher and Julien Signoles is a Research Director both at Universit Paris Saclay CEA List France
