the valley of the Indus River in the early 1920s the Indus civilization had a population estimated at one million people in more than 1000 settlements several of which were cities of some 50 000 inhabitants With an area of nearly a million square kilometers the Indus civilization was more extensive than the contemporaneous urban cultures of Mesopotamia and Egypt Yet after almost a century of excavation and research the Indus civilization remains little understood How might we decipher the Indus inscriptions What language did the Indus people speak What deities did they worship Asko Parpola has spent fifty years researching the roots of Hinduism to answer these fundamental questions which have been debated with increasing animosity since the rise of Hindu nationalist politics in the 1980s In this pioneering book he traces the archaeological route of the Indo Iranian languages from the Aryan homeland north of the Black Sea to Central West and South Asia His new ideas on the formation of the Vedic literature and rites and the great Hindu epics hinge on the profound impact that the invention of the horse drawn chariot had on Indo Aryan religion Parpola s comprehensive assessment of the Indus language and religion is based on all available textual linguistic and archaeological evidence including West Asian sources and the Indus script The results affirm cultural and religious continuity to the present day and among many other things shed new light on the prehistory of the key Hindu goddess Durga and her Tantric cult
