**How to Build Your Own Gaming PC User Manual** Richard E. FRANDSEN, 2021-08-13

Creating a gaming computer from scratch is the only surefire way to ensure that your system can meet all of your personal preferences. When you determine everything that enters your computer from the power supply, you know that you will be able to play the games you want in the ways you want. In addition, a home-made computer keeps the door open for updates as technology changes, so does your gaming tastes and needs, or as your budget allows. Building a gaming computer is probably the best technological investment you can make. A quality gaming device lasts longer; a smartphone boasts more power than a gaming console and is infinitely more versatile than even the most powerful streaming box. Whether you are typing documents, running video editing, or adjusting settings for the latest and greatest games, a gaming PC is the best tool for the job. With regular maintenance, one such system can last up to five years, with regular upgrades, maybe ten. This guide will teach you how to master your own build, your own gaming PC, very fast. This guide is ideal for both pros and newbies. Here are the contents of this guide: What do you need? Computer creation tools: Motherboard, Processor, CPU, Install the motherboard and power supply, Install your graphics card, Load and install Windows. Tips and tricks on how to build your own computer. Starting point: choosing the right processor, Motherboard, or bust. Scroll up and click the Buy Now button to purchase this guide.
