**Underwater Operations** Louis Rey,2012-12-06 Opening Speech of the ICEDIVE 84 Conference by His Royal Highness  
Prince Bertil of Sweden I am very pleased to be invited to open the International Conference ICEDIVE 84 dealing with  
medical and technical problems of diving and related underwater activities in arctic conditions Until recent times the arctic  
was considered astrange and remote area of minor importance However in a world with diminishing natural resources arctic  
areas have become a region of global importance because of their enormous resources and strategie position Certain experts  
believe that more than 50% of oil reserves are sleeping in these northern areas which are cold harsh and hostile to man  
Operations in arctic areas are extremely difficult expensive and demand high levels of technical scientific and physiological  
achievement One should recall for example that Alaskan oil investment only became economically viable after the 1973 1974  
price explosion Recent political military troubles in the Gulf have increased interest in the development of polar resources  
This conference is unique as it is the first time that medical and technical specialists interested in the problem of diving in  
arctic conditions have met in an international forum Development of the arctic resources is a matter of international urgency  
and it pleases me that scientists from the USA Canada the USSR Australia and Europe have gathered here in Stockholm to  
present their experience and to discuss problems in this field      The American Catalogue ,1891      *Oxford Desk Reference:*
