

CHANGE OVER TIME ESSAY

Purpose

Students will write an essay in which they discuss how our knowledge of human origins has changed over time. This essay will help them work on their writing and peer editing skills, and help prepare them for writing their Little Big Histories.

Process

Students will analyze how our knowledge of human origins has changed over time. They'll begin with how scientists and the public viewed the origins of humans prior to Charles Darwin's publication of *On the Origin of Species* (1859), and proceed up to today. They'll have to do a lot of research on the topic in order to learn about their starting point (how people viewed human origins prior to Darwin), as the way to their end point. In order to properly discuss a change over time essay, students need to establish that a change in thinking occurred between the time of Darwin and today. Therefore, a clear explanation of how theories changed from the starting point through the years to the end point is necessary. An analysis of how the change developed is also required. Students should include information about problems that might have arisen during this progression, such as some of the issues people had with accepting new theories, or how cultural differences might have driven previous knowledge out the window.

Remind students that they will be writing an essay that must have a thesis statement with at least two pieces of evidence to support it. They should review the Big History Writing Hub's [Guidelines](#) to ensure they have included all required elements and that these elements meet or exceed the standards. Students should also be reminded that their essays must focus on change over time as it relates to the topic: How has our knowledge of human origins changed from the early twentieth century to today? After they've written and proofread their own essay, put students together to peer edit each other's work. They should use the Big History Peer Review Hub's [Guidelines](#) to evaluate their partner's essay.
