1. The first step in the process of identifying a problem is to define the problem clearly. This involves identifying the symptoms, the scope of the problem, and the impact it is having on the organization.

2. Once the problem has been defined, the next step is to gather information. This involves talking to people who are involved in the problem, looking at data, and researching the problem.

3. The third step is to analyze the information. This involves looking for patterns, identifying causes, and determining the root of the problem.

4. The fourth step is to develop a solution. This involves brainstorming ideas, evaluating the options, and choosing the best solution.

5. The fifth step is to implement the solution. This involves putting the solution into action, monitoring progress, and making adjustments as needed.

6. The final step is to evaluate the results. This involves looking at the data, talking to people, and determining if the problem has been solved.
