Patent Exhaustion Intellectual Property Law Series:

Research Handbook on Intellectual Property and the Life Sciences Duncan Matthews, Herbert Zech, 2017-06-30 Intellectual property IP is a key component of the life sciences one of the most dynamic and innovative fields of technology today At the same time the relationship between IP and the life sciences raises new public policy dilemmas The Research Handbook on Intellectual Property and the Life Sciences comprises contributions by leading experts from academia and industry to provide in depth analyses of key topics including pharmaceuticals diagnostics and genes plant innovations stem cells the role of competition law and access to medicines The Research Handbook focuses on the relationship between IP and the life sciences in Europe and the United States complemented by country specific case studies on Australia Brazil China India Japan Kenya South Africa and Thailand to provide a truly international perspective

Blocking Patents in European Competition Law Angelika S. Murer, 2021-12-03 In practice and jurisprudence in European competition law it is especially difficult to define the boundaries of patent abuse as an offence In this thoroughly researched book the author answers the question of when and how an application for a blocking patent can amount to an abuse of a dominant position under Article 102 TFEU Drawing on legal literature and European Union EU case law the presentation analyses a constellation of blocking patenting strategies and proposes potential remedies where abuse is involved With detailed descriptions of the characteristics of potentially abusive and non abusive behaviour regarding applications for blocking patents the book provides the following and more a comprehensive analysis of the case law of the EU courts on the abuse of a dominant position in cases which involve intellectual property rights insights on how patenting strategies affect competition with a particular focus on the application of blocking patents an overview of the developments in doctrine and practice which led to the current understanding of the seemingly conflictual goals of competition and intellectual property law and insights on the difficulties of defining relevant markets and establishing whether an undertaking holds a dominant position The book illustrates the mechanisms of blocking patenting strategies with examples from the pharmaceutical industry because blocking strategies have particular relevance in applying for patents in that context A test scheme for analysing the application of a blocking patent under Article 102 TFEU is included Additionally the book provides an outlook on the topic of patents and shortages of supply in light of the COVID pandemic Practitioners and policymakers requiring an understanding of the conceptual framework of the abuse concept within EU competition law and how it relates to patent strategies will welcome this invaluable book They will not only be able to set the conduct of applying for blocking patents into the Article 102 TFEU context but also have decisive tools to approach questions on the intersection of patent law and competition law in the EU

The Battle Over Patents Stephen H. Haber, Naomi R. Lamoreaux, 2021 An examination of how the patent system works imperfections and all to incentivize innovation Do patents facilitate or frustrate innovation Lawyers economists and politicians who have staked out strong positions in this debate often attempt to validate their claims

by invoking the historical record but they frequently get the history wrong The Battle over Patents gets it right Bringing together thoroughly researched essays from prominent historians and social scientists this volume traces the long and contentious history of patents and examines how they have worked in practice Editors Stephen H Haber and Naomi R Lamoreaux show that patent systems are the result of contending interests at different points in production chains battling over economic surplus The larger the potential surplus the more extreme are the efforts of contending parties now and in the past to search out generate and exploit any and all sources of friction Patent systems as human creations are therefore necessarily ridden with imperfections This volume explores these shortcomings and explains why despite all the debate historically US style patent systems still dominate all other methods of encouraging inventive activity Research Handbook on the Economics of Intellectual Property Law Ben Depoorter, Peter Menell, David Schwartz, 2019 Both law and economics and intellectual property law have expanded dramatically in tandem over recent decades This field defining two volume Handbook featuring the leading legal empirical and law and economics scholars studying intellectual property rights provides wide ranging and in depth analysis both of the economic theory underpinning intellectual property law and the use of analytical methods to study it IP and Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law, 3rd Edition Hovenkamp, Janis, Lemley, Leslie, Carrier, 2016-01-01 *Developments and Directions in Intellectual Property Law* Hayleigh Bosher, Eleonora Rosati, 2023 Developments and Directions in Intellectual Property Law celebrates the 20th anniversary of the award winning intellectual property blog The IPKat Bringing together eminent practitioners academics and former contributors this book reflects on the most important developments in intellectual property law policy and practice **Intellectual Property and Antitrust** Mariateresa Maggolino, 2011-01-01 This book brings to bear Professor Maggolino's considerable skills as a comparative competition law scholar on what is perhaps the single most important competition policy issue facing us today namely how to use IP policy and competition policy in tandem to further both economic competition and competition in innovation Professor Maggolino's book covers a large range of IP practices by dominant firms where competition law can be invoked including sham litigation and product design improper infringement actions predation and refusals to license This book is well researched well written and completely up to date Every serious competition law antitrust and intellectual property scholar and practitioner should regard it as must reading

Law, Development and Innovation Giuseppe Bellantuono, Fabiano Teodoro Lara, 2015-07-24 This book deals with one strand of the intense debate concerning the links between law and development namely the coordination of innovation processes and legal change It analyzes how innovation and ultimately development can be fostered or hindered by existing or new legal infrastructures The book includes eleven original contributions from senior and junior scholars and is divided into two parts the first focusing on theoretical frameworks and the second presenting several case studies on various institutional

aspects A particular strength of this part is its broad geographical coverage which encompasses the legal frameworks in Europe the Americas Africa and Asia The contributions collected in this book will be of value to a broad readership Academic scholars will find useful information on lessons learned from reforms implemented in different areas and come to better understand the methodological hurdles involved in reform assessment Policymakers in national and international organizations can draw on these studies when designing new programs Lastly practitioners in developed and developing countries can use these contributions to promote the success of current or new initiatives

Intellectual Property Law and Policy Volume 12 Hugh Hansen, 2013-05-22 This is the 17th Annual volume in the series collecting the presentations and discussion from the Annual Fordham IP Conference The contributions by leading world experts analyse the most pressing issues in copyright trademark and patent law as seen from the perspectives of the USA the EU Asia and WIPO This volume in common with its predecessors makes a valuable and lasting contribution to the discourse in IP law as well as trade and competition law The contents while always informative are also critical and questioning of new developments and policy concerns Praise for the series This must be one of the most enjoyable and thought provoking conferences in the IP field The high quality of the speakers is matched by the intense audience led debates and challenges which follow The Honourable Mr Justice Laddie Royal Courts of Justice London Faculty for this conference are always well known names well respected leaders in their fields speaking with a combination of candor and timeliness that is unrivaled by any other forum of its kind
