Phases Of The Moon Gizmo Answer:

The Best of the Rest Sam G. Riley, 1993-06-30 The Best of the Rest presents the work of 77 of America's most talented local newspaper columnists from 41 states. They represent the rest because editor Sam G. Riley has excluded nationally syndicated columnists in order to expose to a wider audience many equally talented columnists whose fame generally is localized. The columnists chosen for inclusion were nominated by a nationwide panel of 100 journalism professors, two from each state. Those writers who agreed to participate either self-selected their two favorite columns or sent a larger sampling for the editor's choice. For this first such book on local columnists, Riley has concentrated on news columnists, personal or general interest columnists, and humor columnists, exempting those who write more or less exclusively on topical areas such as sports, business, and finance, fashion, or travel. In his lively and insightful introduction, Riley identifies three main characteristics of newspaper column writing much in evidence in these selections: humanity or people-centeredness, wit, and freedom of approach. He also sketches a brief history of newspaper column writing and provides a sense of what local columnists do, offering his opinion that being a columnist is the most fun a person can legally have at a newspaper. The selection of columns makes for delightful reading and will be instructive and inspiring to journalism major students and other students of writing. A selective bibliography is included.

Educational Recommender Systems and Technologies: Practices and Challenges Santos, Olga C., 2011-12-31 Recommender systems have shown to be successful in many domains where information overload exists. This success has motivated research on how to deploy recommender systems in educational scenarios to facilitate access to a wide spectrum of information. Tackling open issues in their deployment is gaining importance as lifelong learning becomes a necessity of the current knowledge-based society. Although Educational Recommender Systems (ERS) share the same key objectives as recommenders for e-commerce applications, there are some particularities that should be considered before directly applying existing solutions from those applications. Educational Recommender Systems and Technologies: Practices and Challenges aims to provide a comprehensive review of state-of-the-art practices for ERS as well as the challenges to achieve their actual deployment. Discussing such topics as the state of the art of ERS methodologies to develop ERS and architectures to support the recommendation process, this book covers researchers interested in recommendation strategies for educational scenarios and in evaluating the impact of recommendations in learning, as well as academics and practitioners in the area of technology-enhanced learning.
