The Effect of Parenting on Child and Adolescence Development Yanfang Li, Bin-Bin Chen, Yufang Bian, Wenchao Ma, Lichan Liang, 2025-11-18 Families and parents have the most central and enduring influence on children's lives. Of all the modifiable factors that influence child and adolescent development and life course outcomes, the important role of parenting arouses the interest of many researchers. Exploring the effect of parenting on their children's social emotional adjustment, mental health and academic achievement and its underlying mechanism could provide an extremely important reference for early intervention, prevention and treatment. Despite a large number of local, national or international empirical studies in this field, some questions are still open for discussion, such as the underlying mechanism of the association between parents' cognition, parenting practices and child development under a comprehensive system of parenting in a different demographic (e.g. racial, ethnic and economic contexts), the changes of parenting accompanied with social change and era development, the interaction of parenting and other factors within family system or other external systems (e.g. school and so on). For this Research Topic, we adopt a broad definition of parenting, including parents' opinions and feelings about their own parenting roles and parents' beliefs, attitudes, socialization goals and parenting practices toward their children. The main aim is to explore the effect of parenting on child and adolescent development, including self, social, emotional and academic development, which can help further design effective intervention programs to promote children's and adolescents' positive development via effective parenting. We are particularly interested in manuscripts focusing on the following research subtopics: 1 Theories and underlying mechanisms, mediators or moderators to explain why and how could parenting affect child and adolescent development; 2 The associations between parenting and child development in different demographic contexts or at different times; 3 The similarities and discrepancies between children and parent report about parenting and its influence on the child and adolescent development; 4 The specific effect of paternal parenting or the effect of co-parenting on child and adolescent development; 5 The potential interaction effect of parenting and other factors such as teacher, peer, grandparent and sibling on child and adolescent development. Quantitative studies (e.g. cross-sectional and longitudinal studies, cohort studies, experimental studies, intervention studies, meta-analysis) and qualitative studies (e.g. interview studies, observational studies, systematic review) are both welcome.

Learn from the Legends Karen Ann Krieger, 2000-07 Chuck Leavell, Reese Wynans, Dr. John and Al Kooper are the four legendary performers profiled in this book. These four artists will tell you about their early years and musical beginnings. You'll see and hear music in each of their styles so that you can practice on your own piano. You'll also pick up licks and registrations for the classic Hammond B3 organ. Be advised that a basic level of technical skill is needed to play the exercises in this book. Musical licks are written in the keys of C major or C minor, then transposed to a second key.
