

The Compare/Contrast Essay:

A compare/contrast essay looks at two or more things to find meaningful similarities or differences between them. A comparison explores similarities, and contrasting discusses differences. By analyzing common parts of different things, readers should get a deeper understanding of them.

Two Main Approaches

Although they have many different names, the two main approaches to a compare/contrast essay are *block style* and *point-by-point style*. The block approach explains about three aspects of one topic in a paragraph, then compares or contrasts the same three aspects about another item in the next paragraph. For instance, you may describe Movie A's setting, dialogue, and music, then analyze Movie B's setting, dialogue, and music in relation to Movie A. Meanwhile, in the point-by-point style you write about just one point or aspect of two or more items, identifying their differences and similarities in one or two paragraphs, before moving on to explore the next point of comparison. Block style organization is easier to follow for short essays, while the point-by-point approach is better suited to longer, more complex papers (Comprone 275; Fawcett 123-124). Regardless of essay style, the purpose of a compare/contrast essay is to carefully examine and evaluate the similarities and differences between two or more things.

Compare/Contrast Writing Process

With any comparison essay, brainstorming and prewriting are especially helpful to prevent shallow or circular writing. Make a list or diagram to find common parts to compare, then figure out how those common parts are similar and different, and what effects they have on you as an audience member or on the subjects themselves. In the prewriting stage, it may become clear that the topics of comparison are very similar, so focusing on their differences could be necessary to make your essay more meaningful. Likewise, if the topics seem completely unlike each other at first glance, discussing their hidden similarities may prove more interesting (Fawcett 284). Making these kinds of decisions before drafting can help keep your essay focused and organized.

Writing Philosophy Papers Zachary Seech, Andrew Kania, 2024-08-28 This sixth edition of Writing Philosophy Papers updates and expands one of the most popular guides to philosophical writing assignments for undergraduate students. Written in a clear straightforward style the book covers everything from time management to the difference between i e and e g. The heart of the book is devoted to how to write a thesis defense paper with chapters on the structure of a strong paper, the process of writing and revising, matters of style and usage, and scholarly citation. This advice is illustrated with concrete examples throughout, including a complete thesis defense paper written and formatted according to the book's recommendations. The book also covers how to take good notes from various kinds of philosophical sources, how to write other commonly assigned kinds of papers, and how to study for and take a philosophy exam. A chapter on doing philosophical research contains practical advice on how to discover and access the most helpful sources for a philosophical research paper or annotated bibliography. Because virtually every philosophy assignment requires a basic grasp of arguments, the book ends with a chapter introducing some basic concepts and skills for reasoning well. The heart of the sixth edition has been revised and restructured to lead students even more clearly through the process of drafting, revising, and formatting a thesis defense paper. This new edition also includes an updated, completely revised and expanded chapter on citing sources, giving equal consideration to print and online sources; an updated, completely revised and expanded chapter on doing philosophical research, focused on how to find the most helpful sources for completing a philosophical research paper or annotated bibliography; updated, revised and greatly expanded advice on writing style and usage; a completely revised and expanded treatment of good reasoning, with a new discussion of inductive and abductive reasoning; and new advice on how to take good notes and how to study for and take philosophy exams. In a reassessment of peer review practices, Lee Ann Kastman Breuch explores how computer technology changes our understanding of this activity. She defines virtual peer review as the use of computer technology to exchange and respond to one another's writing in order to improve it. Arguing that peer review goes through a remediation when conducted in virtual

environments the author suggests that virtual peer review highlights a unique intersection of social theories of language and technological literacy
