The Better Angels of Our Nature Steven

Pinker,2011-10-04 If I could give each of you a graduation present it would be this the most inspiring book I ve ever read Bill Gates May 2017 Selected by The New York Times Book Review as a Notable Book of the Year The author of Rationality and Enlightenment Now offers a provocative and surprising history of violence Faced with the ceaseless stream of news about war crime and terrorism one could easily think we live in the most violent age ever seen Yet as New York Times bestselling author Steven Pinker shows in this startling and engaging new work just the opposite is true violence has been diminishing for millenia and we may be living in the most peaceful time in our species s existence For most of history war slavery infanticide child abuse assassinations programs gruesome punishments deadly quarrels and genocide were ordinary features of life But today Pinker shows with the help of more than a hundred graphs and maps all these forms of violence have dwindled and are widely condemned How has this happened This groundbreaking book continues Pinker s exploration of the esesnce of human nature mixing psychology and history to provide a remarkable picture of an increasingly nonviolent world The key he explains is to understand our intrinsic motives the inner demons that incline us toward violence and the better angels that steer us away and how changing circumstances have allowed our better angels to prevail Exploding fatalist myths about humankind s inherent violence and the curse of modernity this ambitious and provocative book is sure to be hotly debated in living rooms and the Pentagon alike and will challenge and change the way we think about our society

Grasslands of the World Victor R. Squires,Jürgen Dengler,Limin Hua,Haiying Feng,2018-09-05 This book begins with a brief account of the extraordinary sequence of events that led to emergence of grasslands as major vegetation formations that now occupy some of the driest and hottest and the highest and coldest on earth as well as vast steppes and prairies in more temperate climes It is the story of grasses successfully competing with forests and woodlands aided and abetted by grazing herbivores and by humans and their use of fire as a tool It is a story of adaptation to changing climates and the changing biophysical environments A major focus of the book is the Palaearctic biogeographic realm that extends over some 45 million km² and thus more than 1/3 of the terrestrial ice free surface on Earth It comprises extensive grasslands of different types and origin which can be subdivided into 1 natural grasslands with 1a steppes climatogenic in dry climates 1b arctic alpine grasslands climatogenic in cold climates and 1c azonal and extrazonal grasslands pedogenic and topogenic as well as 2 secondary grasslands created and sustained by human activities such as livestock grazing mowing or burning Grasslands of the Palaearctic do not only form a major basis for the agriculture of the region and thus its food supply but are also crucial for other ecosystem services and host a supra proportional part of the realm s plant and animal diversity To reflect that suitability of grasslands for biodiversity strongly depends on their state we apply the term High Nature Value grassland to those natural grasslands that are not degraded in good state and those secondary grasslands that are not intensified semi natural The situation in a variety of countries where grasslands are evolving under the influence of global climate change is also considered Case studies are presented on Southern Africa Eastern Africa India China South America

North America and Australia The concluding chapter examines a set of themes arising from the chapters that make up the bulk of this book The following provide a focus recent history of grassland biomes brief recap of current thinking and recent trends with special reference to dry grasslands in the Palearctic regions the current status of grasslands and germplasm resources biodiversity an overview management systems that ensure sustainability how to recover degraded grasslands socio economic issues and considerations in grassland management the impacts of environmental problems in grasslands such as future climate change and intensification and the problems prospects facing pastoralists and other grassland based livestock producers
