Technology for People with Disabilities Denis K. Anson, 2018-08-09 How would you make a phone call or send email if you couldn't hear, see or use your hands? This book shows how assistive technology helps individuals with disabilities perform tasks that people without disabilities may take for granted. Assistive technology can be used in two ways to help people with disabilities to do things that people without disabilities can do without technology and to improve access to everyday technology that is not designed for people with disabilities. In both cases the focus is on matching individuals with the tools best suited to fill their needs. A part of Greenwood's Health and Medical Issues Today series, *Assistive Technology for People with Disabilities* explores what technologies are available to individuals with disabilities, what they can help them to accomplish and potential hurdles to their use that must be overcome. It explores this exciting field broadly and in depth while still keeping the people-first mindset that is the hallmark of assistive technology. In addition, it provides guidance and resources for individuals seeking assistive technology for themselves or for a loved one. **Smart Products, Smarter**

Services Mary J. Cronin, 2010-08-19 We are surrounded by products that have minds of their own. Computing power in the form of microcontrollers, microprocessors, sensors and data storage chips has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods. These smart products are fundamentally changing both the competitive landscape for business and the daily lives of consumers. This book analyzes the evolution of smart products to help managers understand the impact of embedded product intelligence on corporate strategy, consumer value and industry competition. It describes four different ecosystem strategies for designing and launching smart products: the control-focused Hegemon, the standards-focused Federator, the high-growth and brand-focused Charismatic Leader, and the disruptive industry Transformer. This ecosystem model is then applied to smart products in the automotive, wireless energy, residential and health industries. The book concludes with recommendations for successfully managing smart products and services. **PC Mag**, 2004-11-30 PCMag.com is a leading authority on technology, delivering Labs-based independent reviews of the latest products and services.
