Oxford Countdown Guide:

Oxford Guide to CBT for People with Cancer Stirling Moorey, Steven Greer, 2011-11-24 Cognitive Behaviour Therapy CBT has established itself as the psychological treatment of choice for many conditions. It offers a brief convincing common sense approach to the emotional problems faced by people with cancer and there is considerable evidence for its effectiveness. Using a cognitive behavioural model to understand reactions to cancer the authors present cognitive behavioural emotional and interpersonal interventions to help people adjust to the threat to their life and their view of themselves. Case examples illustrate how these techniques are used to reduce anxiety and depression induce a fighting spirit teach effective coping skills and develop open communication between patients and their partners. Now part of the Oxford Guide to Cognitive Behavioural Therapy series this new edition has been updated in light of new clinical and research findings in the fields of psycho oncology and cognitive behaviour therapy over the last 10 years. Mental health professionals working in oncology and health care professionals interested in psychological management will find this a useful source for psychological techniques that can be applied in a busy clinical setting.

Oxford Guide to Metaphors in CBT Richard Stott, Warren Mansell, Paul Salkovskis, Anna Lavender, Sam Cartwright-Hatton, 2010-05-13 The business of cognitive therapy is to transform meanings. What better way to achieve this than through a metaphor. Metaphors straddle two different domains at once providing a conceptual bridge from a problematic interpretation to a fresh new perspective that can cast one's experiences in a new light. Even the simplest metaphor can be used again and again with different clients yet still achieve the desired effect. One such example is the broken leg metaphor for depression. Clients with depression are understandably frustrated with their symptoms. They may often push themselves to get better or tell themselves that they should be better by now. As a therapist it is fair to ask would the client be so harsh and demanding on herself after getting a broken leg. A broken leg needs time to heal and you need to begin to walk on it gradually as it builds up in strength. You can't run before you can walk and if you try you are likely to make it worse. For many clients this simple metaphor is enlightening changing their view of their symptoms as a sign of their own laziness and worthlessness to a view of them as part of an understandable illness that while open to improvement cannot get better overnight. This book shows just how metaphors can be used productively in CBT as an integral part of the treatment. It describes the use of metaphors for a wide range of problems including anxiety and depression and provides countless examples of metaphors that have been used by others in CBT. It brings together in one place hundreds of metaphors that experienced therapists have used to great success. It will be a valuable sourcebook for all cognitive behaviour therapists as well as those training in CBT.
