

Troubleshooting Guide

No power / won't get into programming mode

If you **don't** see connection window: Make sure (PESIP FPC) is connected to vehicle's battery, not constant battery, otherwise programming is not.

The (PESIP FPC) controls the vehicle immediately without pressing any buttons on the steering wheel

During programming, press the buttons on the steering wheel fully with the (PESIP FPC) turn off. Releasing the button too early will cause the (PESIP FPC) to send out a signal even when no buttons are pressed.

The (PESIP FPC) controls the radio when on the steering wheel is turned (mostly late 80's early 90's Honda/Acura)

Program button (PESIP FPC) 2 for version 4.1.

When user's program a new button the previous button does not work

When programming all buttons during programming if you try to program another button, all previous button will be erased. You will have to relearn all previous buttons again.

Installation Instructions

Before You Start

A. Is this product compatible with the vehicle?

Check application guide (supplied sheet) for listing of vehicles and connection information. If not, check with your preferred electronics retailer for an updated list of compatible vehicles.

B. Prepare for the installation.

When you install the PESIP5 while you are installing the new head unit, keep in mind your head unit's location in the factory stereo to isolate certain wires. Sometimes to reprogram the head unit installation with the PESIP5 is not necessary.

When a general installation location for both the PESIP5 plug and the control leads, it keeps in mind that the supplied wire harness is **not** hardwiring, and the 1.0P plug harness is also **not** hardwiring.

• Use a multimeter or approved measuring device for checking vehicle circuit.
