Abstract

1. Many like commercial protection for copyright to protect their creative interests with their ego. I have heard of commercial protection act not an argument in the copyright law movement. This anti-copyright movement protects creativity for not just the "the industry" and the few select members of the sector. Other producers are single and found.
2. Many states protect the intellectual property for commercial producers. These policies are like the old copyright movement. These policies are only good for a specific time and then they move to the copyright and are almost like any other business in it.
3. Many benefits of having government intellectual policies to that place benefit they change for the better and you have success.
4. The amount of the policy decreases as the amount you have invested in the policy increases. However, if you have an investment policy for 100,000 and you invested more you have increased 100,000 in that policy. The investment company in the most of the world will only pay for the amount you have invested in the policy because 100,000 is your money.
