Poles Apart English Edition:

Poles Apart Antoni G. Lewkowicz, 1999-09-02 *Poles Apart* covers a range of themes about the Arctic and Antarctic including the geography glaciology and glacial history ecology living resources governance and history of exploration Topics are examined separately for each pole and each theme is summarized by a rapporteur who draws out the contrast and the similarities This unique format allows the international experts to describe what they know best while addressing the central issues of the book Published in English *Poles Apart* Polly Courtney, 2008 You're lucky being a girl You can always get au pair work Or a job in a Polish bakery apparently they're springing up all over London Marta grits her teeth and nods She is used to this now the assumption that she has come to England to abandon her career and make a fortune changing nappies and cleaning floors It couldn't be further from the truth *Poles Apart* tells the story of an ambitious young graduate from the outskirts of Warsaw who moves to London in search of fresh challenges and the opportunity to make a name for herself But it's harder than she had anticipated Her qualifications are unpronounceable let alone recognisable and the workplace isn't the only area riddled with prejudice Marta's new set of friends are quick to turn their backs on the newcomer as are the men in her life of which there are many Based on a true story *Poles Apart* is an insightful funny cynical look at London life through the eyes of a young migrant It is a book for anyone who has ever encountered preconceptions or prejudice **Poles Apart** Gloria Frydman, 1984 *Finding Europe* Anthony Molho, Diogo Ramada Curto, Niki Koniordos, 2007 In the last decade or so many books have been devoted to the history of Europe Two conceptual axes predominate in a large number of these accounts a discourse focusing on Europe's values and another discourse fashioned largely in opposition to the first which emphasizes the process of European construction The first conceives of Europe's past teleologically as a process by which certain values Christian ethics individualism capitalism tolerance republicanism due process etc were affirmed and came to define European culture The second approach rejects the discourse on values emphasizes the post Enlightenment emergence of the concept of Europe and the political and ideological implications in its continuous redefinitions and re-elaborations during the past two or more centuries This volume offers new approaches that integrate the long temporal dimension of the values based approach albeit devoid of its teleological element with the constructivist interpretation *Value and Naturalism in Marx* Marco Lippi, 2017-11-10 When *Value and Naturalism in Marx* was first published in English in 1979 recent controversies in socialist economic theory had been concentrated on the tenability or untenability of Marx's labour theory of value Marco Lippi's provocative book accepts the Sraffian correction of Marx's account of profits and prices but goes on to ask the central question why did Marx identify value with embodied labour time The answer Lippi argues lies in a strong though little discussed naturalistic strain in Marx's thought Through a novel analysis of the discussion of circulation costs in Volume Two of *Capital* he contends that Marx operated with a concept of production in general as a relationship of man to nature common to all forms of society in which labour time appears as the sole real cost It was this general

conception of production he suggests that underlay Marx's insistence that profits interest rent and faux frais represent no more than a redistribution of a pre-given total the mass of surplus value in a system in which total profit equalled total surplus value and total price total value. While Lippi rejects Marx's naturalistic identification of value with embodied labour time he claims that the account developed from it of the anarchy of the market of commodity fetishism and of the laws of motion of capitalism is in fact logically independent and retains all its empirical validity. Value and Naturalism in Marx: the work of one of the most outstanding younger economists in Italy reveals the classic economic theory of historical materialism in a quite new light.

Bakhtin and Translation Studies Dr. Amith Kumar P.V., 2016-01-14 This book investigates the process of translation in light of the dialogical principles proposed by the Russian literary theorist and philosopher Mikhail Bakhtin. It problematizes interlingual translations by questioning the two extreme tendencies in translation namely complete target orientedness on the one hand and close imitation of the source text on the other. In the field of cultural encounters it envisages a Bakhtinian model which is proposed as an alternative to the existing interpretations that discuss the cultural subtleties when two different cultures encounter each other. The overall framework of the book is Bakhtinian that is it adopts a dialogic approach and its main focus is the examination of a Western theoretical formulation through examples from Indian literatures and cultural situations. Such an extension of Bakhtin's ideas especially to explore examples from Indian literary cultural and translational fields has not yet received sufficient attention. The study is not only a unique endeavour in filling up the lacunae but also draws Bakhtin closer to the Indian literary condition.

Religious Imaginations James Walters, 2018-12-15 Market globalization technology climate change and postcolonial political forces are together forging a new more modern world. However caught up in the mix are some powerful religious narratives that are galvanizing peoples and reimagining and sometimes stifling the political and social order. Some are repressive fundamentalist imaginations such as the so-called Islamic Caliphate. Others could be described as post-religious such as the evolution of universal human rights out of the European Christian tradition. But the question of the compatibility of these religious worldviews particularly those that have emerged out of the Abrahamic faith traditions is perhaps the most pressing issue in global stability today. What scope for dialogue is there between the Jewish Muslim and Christian ways of imagining the future? How can we engage with these multiple imaginations to create a shared and peaceful global society? *Religious Imaginations* is an interdisciplinary volume of both new and well-known scholars exploring how religious narratives interact with the contemporary geopolitical climate.
