**Evaluating Environment in International Development** Juha I. Uitto, 2014-04-24 More than twenty years after the Earth Summit was held in Rio de Janeiro in 1992 both national and international actors in governmental and nongovernmental fields are still searching for insights into how sustainable development can be advanced and environmental concerns incorporated into the development agenda more effectively Moreover climate change has emerged as a preeminent challenge to both the environment and to development

Evaluating Environment in International Development provides international perspectives and in depth knowledge of evaluating development and the environment and applies evaluation knowledge to climate change mitigation and adaptation. The book focuses on the approaches and experiences of leading international organizations not for profits and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision makers. It provides novel and in depth perspectives on evaluating environment and sustainability issues in developing countries. Moving beyond projects and programmes it considers aspects such as evaluating normative work on the environment and evaluating environmental consequences of economic and social development efforts. This original collection should be of interest to scholars of environment studies, development studies, international relations, sustainable development and evaluation as well as practitioners in international organizations and development and environmental NGOs.

***Climate Litigation and Vulnerabilities*** Maria Antonia Tigre, Melanie Jean Murcott, Susan Ann Samuel, 2025-06-19. This volume explores climate litigation as a means to tackle the rights and socio ecological intergenerational gender racial and other justice implications of the ever growing vulnerability to climate change whilst critically engaging with the notions of vulnerability and intersectional climate justice. With insightful analysis, thought provoking case studies and a global perspective, the collection illustrates the opportunities and pitfalls of litigation pursued by people from the Global South who face intersecting forms of oppression and marginalisation amidst the climate crisis. Contributors discuss litigation strategy, novel legal arguments, institutional barriers and unique socio ecological and political challenges in the Global South. Divided into two parts, the book recognises that climate change is an existential threat to humanity, more frequently being tackled in courts worldwide. The first part exposes the limits of litigation as a mechanism for intersectional climate justice for vulnerable people in the Global South. The second part highlights innovations in climate litigation in pursuit of intersectional climate justice. The book will be of interest to academics, researchers and policymakers in the areas of human rights law, environmental law, climate law, Latin American studies, South Asian studies and African studies.

**Global Challenges in Maritime Security** Lisa Otto, Anja Menzel, 2024-10-22. Achieving sustainability is perhaps the single most important task for our generation. In the face of a looming climate disaster, calls for the sustainable use of the world's resources are getting louder. As the sea covers more than 70 per cent of the earth's surface, this holds even more true for the use of ocean resources. Despite its vastness, the sea has often been a securitised and politicised space where the concepts of sustainability and security meet at sea in the form of a myriad of important contemporary issues. In this volume, we set out the intersection between sustainability and security alongside the security development nexus and examine these issues under four dimensions of security: economic security, ecological security, human security and traditional security. Within sections dedicated to each of these, we explore both theory and practice by offering cases alongside a conceptual discussion and, in so doing, cover topics ranging from the Blue Economy and the net zero agenda to natural disasters and climate change from

food security and the future of Small Island Developing States to the geopolitics of the Arctic This book takes a bird's eye view connecting the dots between these issues of security and sustainability and ending with scenarios for the future with policy making in mind This volume presents a timely and compelling argument that policymakers and scholars need to come to terms with the intersection of sustainability and security at sea The editors detail a clear and insightful conceptual approach for grasping the simultaneity and interplay of security and sustainability concerns that will give inspiration to further research in the field Chapter contributors convincingly illustrate aspects of this approach across regions scales and sites of political engagement from port cities to the UN A must read for students researchers and practitioners of ocean politics Elana Wilson Rowe Research Professor at the Norwegian Institute of International Affairs NUPI Too often issues of security and sustainability at sea have been studied in narrow terms This volume makes a critical contribution the literature by unpacking the interconnections and interdependence between these two vitally important issues Robert McCabe Assistant Professor and Director of the MA Maritime Security Programme at Coventry University In this timely publication an international set of contributors portray a rich array of views on the oceans security and sustainability for the reader Of particular value is how the security sustainability nexus runs through the chapters to emphasise the ever growing importance and relevance of this interplay Francois Vre Professor Emeritus of Military Science and Research Coordinator at the Security Institute for Governance and Leadership in Africa SIGLA Stellenbosch University
