appreciation for the planet Earth and its inhabitants and demonstrate how relevant Earth Science is to our lives and communities. Recurring themes: interactions of spheres, scale, cycles, energy, humans and the earth system are woven throughout the five chapters which cover an introduction to the earth system, geosphere, hydrosphere, atmosphere and cosmosphere. For anyone who wants to explore the science of the Earth.

Steps to Facilitate Principal-Investigator-Led Earth Science Missions National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Earth Studies, 2004-04-21. Principal investigator PI Earth science missions are small focused science projects involving relatively small spacecraft. The selected PI is responsible for the scientific and programmatic success of the entire project. A particular objective of PI led missions has been to help develop university based research capacity. Such missions however pose significant challenges that are beyond the capabilities of most universities to manage. To help NASA's Office of Earth Science determine how best to address these, the NRC carried out an assessment of key issues relevant to the success of university based PI led Earth observation missions. This report presents the result of that study. In particular, the report provides an analysis of opportunities to enhance such missions and recommendations about whether and if so how they should be used to build university based research capabilities.

Primary Science Kit Rosemary Sherrington, 2002. This kit has been devised to help teachers of primary science in schools of all sizes. The two year age band structure, the compact size of the resources, correlation to the QCA Scheme of Work and recommended teaching times all contribute to making teaching science more effective in the school. The Teacher Resource Books contain a comprehensive series of clearly structured lesson plans that enable you to teach the QCA Scheme of Work with six units in each year.
