Matrescence Lucy Jones, 2024-05-07 LONGLISTED FOR THE WOMEN'S PRIZE FOR NON FICTION From the acclaimed author of *Losing Eden* Powerful beautifully written Anthony Doerr an important moving passionate and passionately written inquiry personal and scientific into what happens mentally spiritually physically during the process of becoming a mother from pregnancy and childbirth to early motherhood and what this profound process tells us about the way we live now I read your book or more accurately devoured it Loved it It will be the new classic text in Motherhood Studies Andrea O'Reilly founder Motherhood Studies The best book I've ever read about motherhood *Matrescence* is essential reading bloody and alive roaring and ready to change conversations Jude Rogers The Observer UK In this important and ground breaking deeply personal investigation Jones writes of the emerging concept of matrescence the wholeness of becoming a mother Drawing on her own experiences of twice becoming a mother as well as exploring the latest research in the fields of neuroscience and evolutionary biology psychoanalysis and existential therapy sociology economics

and ecology Jones writes of the physical and emotional changes in the maternal mind body and spirit and shows us how these changes are far more profound wild and enduring than have been previously explored or written about Part memoir part scientific and health reporting part social critique ecological philosophy eco feminism and nature writing Matrescence is a kind of whodunnit ferreting out with the most nuanced searing and honest observations why mothers throughout this heightened transition are at a breaking point and what the institution of intensive isolated motherhood can tell us about our still dominant social and cultural myths Jones seems to come as close as it s possible to describing this indescribable moment in a woman s life Joanna Pocock The Spectator UK

Double Blessing Mark Batterson,2020-08-04 God doesn t bless us to raise our standard of living God blesses us to raise our standard of giving and that s where true joy is found The New York Times bestselling author of Chase the Lion challenges us not to settle for half of what God offers when it comes to blessings we are BLESSED to BLESS His discovery started with a simple experiment Whenever Batterson received a blessing he would give a similar blessing away If someone paid him a compliment or gave him a gift or went out of their way to help him he would return the favor by doing something similar for someone else We flip the blessing by blessing others in the way God has blessed us That s how the blessing becomes a double blessing It turns giving into a game one we can t win because God will always outgive us It s an ancient truth found within the Abrahamic covenant I will bless you and you will be a blessing In other words we are blessed to bless The first blessing is receiving but it doesn t end there The second blessing is giving it away That s the double blessing And that s where double joy is found In a day and age where the idea of blessing has been reduced to a hashtag blessed Batterson challenges readers to pursue true God glorifying blessing and experience an exponential impact by participating in the double blessing Don t settle for half of what God offers Discover how you can both get it and give it in Double Blessing This edition includes discussion questions

Challenges in Science Education Gregory P. Thomas,Helen J. Boon,2023-03-12 This edited volume focuses on challenges facing science education across three areas curriculum teacher education and pedagogy Integrating a diverse range of perspectives from both emerging and established scholars in the field chapters consider the need for measured responses to issues in society that have become pronounced in recent years including lessons from the Covid 19 pandemic the environment and persisting challenges in STEM teaching and learning In doing so the editors and their authors chart a potential course for existing and future possibilities and probabilities for science education

What Is Cybersecurity For? Tim Stevens,2023-03-28 How will protecting our digital infrastructure shape our future Cybersecurity is one of the key practical and political challenges of our time It is at the heart of how modern societies survive and thrive yet public understanding is still rudimentary media portrayals of hoodie wearing hackers accessing the Pentagon don t convey its complexity or significance to contemporary life This book addresses this gap showing that the political dimension is as important as the technological one It accessibly explains the complexities of global information systems the challenges of providing security to users societies states and the international system and the

multitude of competing players and ambitions in this arena Making the case for understanding it not only as a technical project but as a crucial political one that links competing visions of what cybersecurity is for it tackles the ultimate question how can we do it better *English Mechanic and World of Science* ,1874 **The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 2, Shared Transformations?** J. R. McNeill,Kenneth Pomeranz,2015-04-16 Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind The second book questions the extent to which the transformations of the modern world have been shared focusing on social developments such as urbanization migration and changes in family and sexuality cultural connections through religion science music and sport ligaments of globalization including rubber drugs and the automobile and moments of particular importance from the Atlantic Revolutions to 1989 **El-Hi Textbooks in Print** ,1972 *Identity, Culture, and the Science Performance, Volume 1* Vivian Appler,Meredith Conti,2022-08-11 Identity Culture and the Science Performance Volume 1 From the Lab to the Streets is the first of two volumes dedicated to the diverse sociocultural work of science oriented performance A dynamic volume of scholarly essays interviews with scientists and artists and creative entries it examines explicitly public facing science performances that operate within and for specialist and non specialist populations The book s chapters trace the theatrical and ethical contours of live science events re enact historical stagings of scientific expertise and demonstrate the pedagogical and activist potentials in performing science in community settings Alongside the scholarly chapters From the Lab to the Streets features creative work by contemporary science integrative artists and interviews with popular science communicators Sahana Srinivasan host of Netflix s Brainchild and Raven Baxter Raven the Science Maven and artists from performance ensembles The Olimpias and Superhero Clubhouse In exploring the science performance as a vital but flawed method of public engagement it offers a critique of the racist ableist sexist and heteronormative ideologies prevalent across the history of science as well as highlighting science performances that challenge and redress these ideologies Along with its complementary volume From the Curious to the Quantum this book documents the varied ways in which identity categories and cultural constructs are formed and reformed through science performances Artificial Intelligence For Science: A Deep Learning Revolution Alok Choudhary,Geoffrey C Fox,Tony Hey,2023-03-21 This unique collection introduces AI Machine Learning ML and deep neural network technologies leading to scientific discovery from the datasets generated both by supercomputer simulation and by modern experimental facilities Huge quantities of experimental data come from many sources telescopes satellites gene sequencers accelerators and electron microscopes including international facilities such as the Large Hadron Collider LHC at CERN in Geneva and the ITER Tokamak in France These sources generate many petabytes moving to exabytes of data per year Extracting scientific insights from these data is a

major challenge for scientists for whom the latest AI developments will be essential The timely handbook benefits professionals researchers academics and students in all fields of science and engineering as well as AI ML and neural networks Further the vision evident in this book inspires all those who influence or are influenced by scientific progress

English Mechanic and Mirror of Science and Art ,1923 *Embodiment and Cognitive Science* Raymond W. Gibbs, Jr,2005-12-05 This 2006 book explores how people s subjective felt experiences of their bodies in action provide part of the fundamental grounding for human cognition and language Cognition is what occurs when the body engages the physical and cultural world and must be studied in terms of the dynamical interactions between people and the environment Human language and thought emerge from recurring patterns of embodied activity that constrain ongoing intelligent behavior We must not assume cognition to be purely internal symbolic computational and disembodied but seek out the gross and detailed ways that language and thought are inextricably shaped by embodied action Embodiment and Cognitive Science describes the abundance of empirical evidence from many disciplines including work on perception concepts imagery and reasoning language and communication cognitive development and emotions and consciousness that support the idea that the mind is embodied
