

Chapter 39**Endocrine and Reproductive Systems****Section 39–1 The Endocrine System** (pages 997–1002)

This section describes the function of the endocrine system and explains how it maintains homeostasis.

Introduction (page 997)

1. What makes up the endocrine system? The endocrine system is made up of glands that release their products into the bloodstream.
2. What do the products of the endocrine system do? They broadcast messages throughout the body.

Hormones (page 997)

3. Chemicals that travel through the bloodstream and affect the activities of other cells are called hormones.
4. How do hormones affect the activities of other cells? Hormones bind to specific chemical receptors on other cells.
5. Cells that have receptors for a particular hormone are referred to as target cells.
6. Is the following sentence true or false? Cells without receptors are not affected by hormones. true
7. Is the following sentence true or false? Generally, the body's responses to hormones are quicker and shorter lasting than the responses to nerve impulses. false

Glands (page 998)

8. An organ that produces and releases a substance, or a secretion, is called a(an) gland.
9. Complete the Venn diagram by adding titles.

Laboratory Manual for Anatomy and Physiology Connie Allen, Valerie Harper, 2011-01-05 The Laboratory Manual for

Anatomy and Physiology by Allen and Harper presents material in a clear and concise way. It is very interactive and contains activities and experiments that enhance readers' ability to both visualize anatomical structures and understand physiological topics. Lab exercises are designed to require readers to first apply information they learned and then to critically evaluate it. All lab exercises promote group learning and the variety offers learning experiences for all types of learners: visual, kinesthetic, and auditory. Additionally, the design of the lab exercises makes them easily adaptable for distance learning courses.

Principles of Human Body Organization and Function Mr. Rohit Manglik, 2024-07-30. Providing a foundational understanding of how the human body is structured and functions at the cellular, tissue, organ, and system levels, this book is ideal for beginners in health sciences.

Emergency Room Coding Ba Kobayashi, 2010-07. Emergency Room Coding will prepare you for the real world of coding in the emergency department setting. The text provides the beginning coder with a solid foundation of how to code ER charts. We focus on the diagnoses and procedures seen in the majority of community-based hospitals. The scenarios in this book are based on real-life experiences and will provide the coder with situations s/he will most likely encounter in the emergency room coding environment. The study guide contains 32 emergency room records. The case studies are representative of what is commonly treated in most emergency rooms. Each case study contains an ER report and an answer worksheet. The ER record serves as a good teaching tool for new coders because ER records do not require as much clinical background to code as inpatient records. However, some of the injury cases may present a challenge for new coders. Also, unlike most coding textbooks, this study guide contains a complete ER report with a full explanation, not just thumbnail sketches. Therefore, Emergency Room Coding is more realistic than the one to two line diagnostic statements encountered in most coding textbooks. Finally, the Answer Key for the case studies contains a rationale for all code assignments as well as directions for locating the correct diagnostic and procedure codes. A multiple choice final review quiz is included at the end of this study guide as an opportunity for coders to test their coding skill set. Emergency Room Coding is updated annually to reflect the annual coding changes.

Who is this book for? Coders needing to develop ER coding skills. Students. Beginning coders trying to get their first job. Anyone needing to understand ER code assignment. Coding supervisors. HIM Directors. Auditors. Compliance Officers. Case Managers. What's Inside: 32 Case Studies, Dictated ER Reports, Answer Key, Rationale, Instructions on how to locate codes in ICD-9 Coding Book, Final Exam.
