Portland, OR Study Guide For Statistics For Business And Financial Economics Ronald L. Moy, 1999-12-16 The organization of this study guide parallels that of Cheng F. Lee's *Statistics for Business and Financial Economics*, providing a comprehensive treatment of every chapter. To maximize students' understanding of the material, the author presents it in a slightly different though complementary way. For each chapter, the study guide provides:

- Chapter Intuition: Each chapter begins with an intuitive verbal explanation of the chapter's central message on why the chapter is important and where it is headed.
- Chapter Review: Rather than just giving a simple outline of the chapter, all the key concepts in the chapter are covered in a simple, easy-to-follow account.
- Useful Formulas: Where appropriate, a list of useful formulas from the chapter is provided so that one need not search the text to find formulas necessary for solving the problems.
- Example Problems and Solutions: Here sample problems similar to the problems in the text are provided along with step-by-step solutions. To provide a guide to solving the problems, each example states the topic that the problem illustrates.
- Supplementary Exercises: Once the example problems are studied, one's skills can be put to work by solving problems. A variety of exercise types is offered to accommodate various learning styles.
