Environmental Activism, Social Media, and Protest in China Elizabeth Brunner, 2019-07-05 Environmental Activism Social Media and Protest in China Becoming Activists over Wild Public Networks builds upon existing social movement scholarship in communication studies China studies and sociology by analyzing China's vibrant contemporary environmental protests Using news reports social media feeds and conversations with witnesses and participants in the protests Elizabeth Brunner examines three important antiparaxylene PX protests the 2007 protests in Xiamen the 2011 protests in Dalian and the 2014 protests in Maoming Brunner argues for the treatment of protests as forces majeure and asserts the legitimacy of wild public networks Brunner stresses that scholars must take a networked approach to social movements as new media become valid platforms for furthering social change especially in areas where censorship is common Green European Audrone

Telesiene, Matthias Gross, 2016-07-01 Green European addresses the quest for a better understanding of European types of environmentalism This monograph focuses on public attitudes and behaviours and the culturally rooted as well as country specific differences The book addresses the wider issue that many European countries are rendered green or as having an advanced environmental awareness but the question how green are Green Europeans really is yet to be answered The book covers a variety of unique data driven comparative studies and is divided into three parts the first addresses perceptions of environmental and technological threats and risks the second part deals with environmental activism in Europe the third discusses environmental attitudes environmental concerns and their imminent link to personal pro environmental behaviour The empirical comparative nature of the contributions is enabled by data from the International Social Survey Programme ISSP

Maternal Activism Danielle Poe, 2015-02-11 Maternal Activism tells the stories of women who refused to ignore injustice even though many people urged them to stop their activism by claiming it would harm their children Molly Rush Michele Naar Obed Cindy Sheehan and Diane Wilson recognized that the potential well being of their children relates to the damage done by US militarism and environmental destruction These women's stories illustrate feminist ethical theory and contemporary theory from peace studies By examining their context for addressing injustice and the theoretical supports for their action this book demonstrates that issues of injustice overlap such that critiques of nuclear weapons lead to critiques of war and militarism which lead to critiques of environmental destruction **Community Culture and the Environment**

, 2002 **Instructor's Resource Manual for Talk it Over!** Joann Kozyrev, 1998 **Resigned Activism, revised edition** Anna Lora-Wainwright, 2021-03-09 An examination of the daily grind of living with pollution in rural China and of the varying forms of activism that develop in response Residents of rapidly industrializing rural areas in China live with pollution every day Villagers drink obviously tainted water and breathe visibly dirty air afflicted by a variety of ailments from arthritis to nosebleeds that they ascribe to the effects of industrial pollution In Resigned Activism Anna Lora Wainwright explores the daily grind of living with pollution in rural China and the varying forms of activism that develop in response This revised

edition offers expanded acknowledgment of the contributions of Lora Wainwright's collaborators in China. Lora Wainwright finds that claims of health or environmental damage are politically sensitive and that efforts to seek redress are frustrated by limited access to scientific evidence, growing socioeconomic inequalities, and complex local realities. Villagers feeling powerless often come to accept pollution as part of the environment; their activism is tempered by their resignation. Drawing on fieldwork done with teams of collaborators, Lora Wainwright offers three case studies of resigned activism in rural China, examining the experiences of villagers who live with the effects of phosphorous mining and fertilizer production, lead and zinc mining, and electronic waste processing. The book also includes extended summaries of the in-depth research carried out by Ajiang Chen and his team in some of China's cancer villages, village-sized clusters of high cancer incidence. These cases make clear the staggering human costs of development and the deeply uneven distribution of costs and benefits that underlie China's economic power.

Global Trends in Eastern Europe Nikolai Genov, 2016-04-22 Eastern Europe was once clearly defined by the centralized political and economic organization of the societies in the region. They shared the same official ideology and were members of the same alliances. After 1989, the region collapsed in an economic, political, and cultural implosion. What were the moving forces of this profound change? What are its consequences? Could we try to reasonably foresee any future developments? In this thought-provoking book, Nikolai Genov presents a systematic description and explanation of Eastern European societal transformations after 1989. They are interpreted as adaptations to four global trends: upgrading the rationality of organizations, individualization, spreading of instrumental activism, and universalization of value normative systems. Adaptations to these trends have generally been successful. However, Genov notes that the process is marked by many failures as well. They are mostly caused by path dependency in the societal development and by the varying quality of relevant decisions. Other destructive developments are due to contradictions in the global trends themselves. Guided by the assumption that the societal and supranational integration mechanisms in Eastern Europe before 1989 could not resist the overwhelming power of global trends, Genov's controversial findings question visions about the end of history and simultaneously strengthen the confidence that most complex macro-social processes can be rationally managed. A timely book allowing for a much-needed engagement in contemporary debates on the controversial processes in Eastern European transitions.
