Essential Dubai Guide SKS Singarum, Vinod Kumar, 2015-11-28 Written by S K S Singarum, Vinod Kumar, this book is nothing less than an essential guide for all those who are coming to Dubai for the first time. If you are from the Indian subcontinent, it is a little easier for you to understand and appreciate the local dress and other cultural traditions. But you need not worry if you are from a western country as this ultimate guide on Dubai will make you feel at home with all the information provided in this book. The book contains lots of illustrations to make it easier for the readers.

Cognitive mechanisms for safe road traffic systems Giovanni Vecchiato, Lewis L. Chuang, Christer Ahlström, 2022-12-16 *Holistic Simulation of Geotechnical Installation Processes* Th. Triantafyllidis, 2015-06-11 The book

provides suitable methods for the simulations of boundary value problems of geotechnical installation processes with reliable prediction for the deformation behavior of structures in static or dynamic interaction with the soil. It summarizes the basic research of a research group from scientists dealing with constitutive relations of soils and their implementations as well as contact element formulations in FE codes. Numerical and physical experiments are presented providing benchmarks for future developments in this field. Boundary value problems have been formulated and solved with the developed tools in order to show the effectivity of the methods. Parametric studies of geotechnical installation processes in order to identify the governing parameters for the optimization of the process are given in such a way that the findings can be recommended to practice for further use. For many design engineers in practice the assessment of the serviceability of nearby structures due to geotechnical installation processes is a very challenging task. Some hints about possible effects and their consideration are given in this book which may provide a help for such estimations which are still not possible to be given in a satisfactory manner.

Digital Analytics Applications for Sustainable Training and Education Kiran Sood, Prateek Kalia, Simon Grima, Aryan Chaudhary, 2024-11-01. Digital analytics is an emerging new trend used in education to measure, collect, analyze, and report on data about learners and their contexts and to understand and optimize learning and learning environments. Taking into consideration the UN's Sustainable Development Goal 4 which aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all, this new book looks at digital technologies as a means to foster sustainable educational innovations for improving the teaching, learning, and assessment from K-12 to higher education. It demonstrates how artificial intelligence, deep learning, cloud computing, big data, and machine learning can be used to assess, evaluate, record, and predict student progress, participation, performance, personalization, and empowerment in academic and curricular activities.

Information Efficiency and Anomalies in Asian Equity Markets Qaiser Munir, Sook Ching Kok, 2016-10-04. The efficient market hypothesis (EMH) maintains that all relevant information is fully and immediately reflected in stock prices and that investors will obtain an equilibrium rate of return. The EMH has far-reaching implications for capital allocation, stock price prediction, and the effectiveness of specific trading strategies. Equity market anomalies reflect that the market is inefficient and hence contradicts the EMH. This book gathers both theoretical and practical perspectives by including research issues, methodological approaches, practical case studies, uses of new policy, and other points of view related to equity market efficiency to help address the future challenges facing the global equity markets and economies. *Information Efficiency and Anomalies in Asian Equity Markets: Theories and Evidence* is an insightful resource that will be useful for students, academics, and professionals alike.

Nonlinear Time Series Analysis with R Ray Huffaker, Marco Bittelli, Rodolfo Rosa, 2017-10-20. *Nonlinear Time Series Analysis with R* provides a practical guide to emerging empirical techniques allowing practitioners to diagnose whether highly fluctuating and random appearing data are most likely driven by random or deterministic dynamic forces. It joins the chorus of voices recommending getting to know your data as an

essential preliminary evidentiary step in modelling Time series are often highly fluctuating with a random appearance Observed volatility is commonly attributed to exogenous random shocks to stable real world systems However breakthroughs in nonlinear dynamics raise another possibility highly complex dynamics can emerge endogenously from astoundingly parsimonious deterministic nonlinear models Nonlinear Time Series Analysis NLTS is a collection of empirical tools designed to aid practitioners detect whether stochastic or deterministic dynamics most likely drive observed complexity Practitioners become data detectives accumulating hard empirical evidence supporting their modelling approach This book is targeted to professionals and graduate students in engineering and the biophysical and social sciences Its major objectives are to help non mathematicians with limited knowledge of nonlinear dynamics to become operational in NLTS and in this way to pave the way for NLTS to be adopted in the conventional empirical toolbox and core coursework of the targeted disciplines Consistent with modern trends in university instruction the book makes readers active learners with hands on computer experiments in R code directing them through NLTS methods and helping them understand the underlying logic please see www.marco.bittelli.com The computer code is explained in detail so that readers can adjust it for use in their own work The book also provides readers with an explicit framework condensed from sound empirical practices recommended in the literature that details a step by step procedure for applying NLTS in real world data diagnostics *Advances in Signal and Data Processing* S.
